Version 3.1

Copyright ©2024 Vizrt. All rights reserved.

No part of this software, documentation or publication may be reproduced, transcribed, stored in a retrieval system, translated into any language, computer language, or transmitted in any form or by any means, electronically, mechanically, magnetically, optically, chemically, photocopied, manually, or otherwise, without prior written permission from Vizrt.

Vizrt specifically retains title to all Vizrt software. This software is supplied under a license agreement and may only be installed, used or copied in accordance to that agreement.

Disclaimer

Vizrt provides this publication “as is” without warranty of any kind, either expressed or implied. This publication may contain technical inaccuracies or typographical errors. While every precaution has been taken in the preparation of this document to ensure that it contains accurate and up-to-date information, the publisher and author assume no responsibility for errors or omissions. Nor is any liability assumed for damages resulting from the use of the information contained in this document. Vizrt’s policy is one of continual development, so the content of this document is periodically subject to be modified without notice. These changes will be incorporated in new editions of the publication. Vizrt may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time.

Vizrt may have patents or pending patent applications covering subject matters in this document. The furnishing of this document does not give you any license to these patents.

Antivirus

Vizrt does not recommend or test antivirus systems in combination with Vizrt products, as the use of such systems can potentially lead to performance losses. The decision for the use of antivirus software and thus the risk of impairments of the system is solely at the customer's own risk.

There are general best-practice solutions, these include setting the antivirus software to not scan the systems during operating hours and that the Vizrt components, as well as drives on which clips and data are stored, are excluded from their scans (as previously stated, these measures cannot be guaranteed).

Technical Support

For technical support and the latest news of upgrades, documentation, and related products, visit the Vizrt web site at www.vizrt.com.

1 Introduction

Vizrt is releasing an update to the License Portal that enables customers to manage licenses, using [WIBU Systems](#). This documentation guides you through the different options and processes.

1.1 Improvements And Bug Fixes

Kindly check the [Vizrt Licensing Release Notes](#) for the latest changes.

This software protection program is implemented in Vizrt software as part of major new releases. Prior versions covered by software protection can continue to run on the node-locked licensing.

2 License Options

- [Supported Setups](#)
- [Hardware Dongle](#)
- [Software Container](#)

2.1 Supported Setups

Client Type	Hardware Dongle	Software Container	License Server
On-Premise			
Physical local machines	✓	✓	✓
Virtualized local machines	✓	✓	✓
Physical license servers	✓	✓	
Virtualized license servers	✓	✓	
Cloud			
Client machines		✓	✓
License servers		✓	

2.2 Hardware Dongle

These are recommended for on-premise license servers, as they can be attached to a backup server without further restrictions.

License Dongles can also be used on local machines.

2.3 Software Container

For dongle-less workflows, a Software Container is recommended, usable for License Servers and local usage.

For virtualized environments and cloud environments, a dedicated Software Container called Smartbind_Loose is required. This container type can be added to individual users as a permission, which allows the user to create this container type and activate licenses on it.

 **Quick Troubleshooting**

Info: Software container protection is performed on the hardware elements on validation. If the hardware is changed, the WIBU container validation may fail, making licenses unavailable.

3 System Requirements

The WIBU V3 license items provide a faster license activation and allows Vizrt software products to allocate the licenses faster. In addition, the features were reduced to reduce complexity.

These are the supported products and browsers.

3.1 CodeMeter Runtime

Running Vizrt Software requires WIBU CodeMeter Runtime 7.51 or later.

3.2 Supported Products

Vizrt Product	First Version Supporting WIBU V2	First Version Supporting WIBU V3
Viz Engine	3.10.0	5.x
Graphic Hub	3.1.0	3.8.0
Viz Virtual Studio	1.1.1	1.6.1
Media Sequencer	5.4.0	TBA
Viz Trio	4.0.0	4.2.0
Viz Multiplay	See MSE	3.1.
Viz Pilot Edge	See MSE	TBA
Viz Libero	6.11.2	TBA
Viz Arena	5.0.0	TBA
Viz Arc	1.0.0	TBA
Viz Vectar	1.0.0	TBA
Viz Datacenter	1.0.0	2.0.0
Viz Channel Branding		5.0

Vizrt Product	First Version Supporting WIBU V2	First Version Supporting WIBU V3
Viz Story		3.1

3.3 Supported Browsers For The License Portal

- Google Chrome
- Firefox
- Microsoft Edge

4 Vizrt License Portal

This section contains information on the following topics:

- [Vizrt License Portal Landing Page](#)
- [Licenses](#)
- [Containers](#)
- [Free Licenses](#)
- [Online License Activation](#)
- [Offline License Activation](#)
- [Admin](#)
- [Customers](#)
- [Account](#)
- [Re-Hosting](#)

4.1 Vizrt License Portal Landing Page

This page contains the following information:

- [License Portal](#)
- [Logging into the License Portal](#)
 - [Artist Free Login](#)
 - [Vizrt Community Login](#)
- [Auto Update](#)
- [Troubleshooting](#)

4.1.1 License Portal

The License Portal can be reached at <https://license.vizrt.com>.

Home Auto Update

Welcome to License Portal

If you are an Artist Free user please enter your username and password here. This will give you access to Artist Free licenses only.

Email Address Password Login

If you are a commercial Vizrt Customer with Community access, please click the Community Login button below.

Community Login

4.1.2 Logging into the License Portal

Artist Free Login

Users of Artist Free can log in using the marked login with the credentials used to sign up for Artist Free:

Home Auto Update

Welcome to License Portal

If you are an Artist Free user please enter your username and password here. This will give you access to Artist Free licenses only.

Email Address Password Login

If you are a commercial Vizrt Customer with Community access, please click the Community Login button below.

Community Login

Vizrt Community Login

For Vizrt customers with access to other Vizrt Community Services, the Community Login page should be used.

Home Auto Update

Welcome to License Portal

If you are an Artist Free user please enter your username and password here. This will give you access to Artist Free licenses only.

Email Address Password Login

If you are a commercial Vizrt Customer with Community access, please click the Community Login button below.

Community Login

✔ **Tip:** If you already have an account for <https://community.vizrt.com>, you can use the same credentials.

Once in the license portal, you can use the **Community Login** button and the SSO of Vizrt to log into the portal.

[Did you forget your password?](#)

4.1.3 Auto Update

Vizrt Licensing Portal offers the functionality to update licenses without logging into the portal.

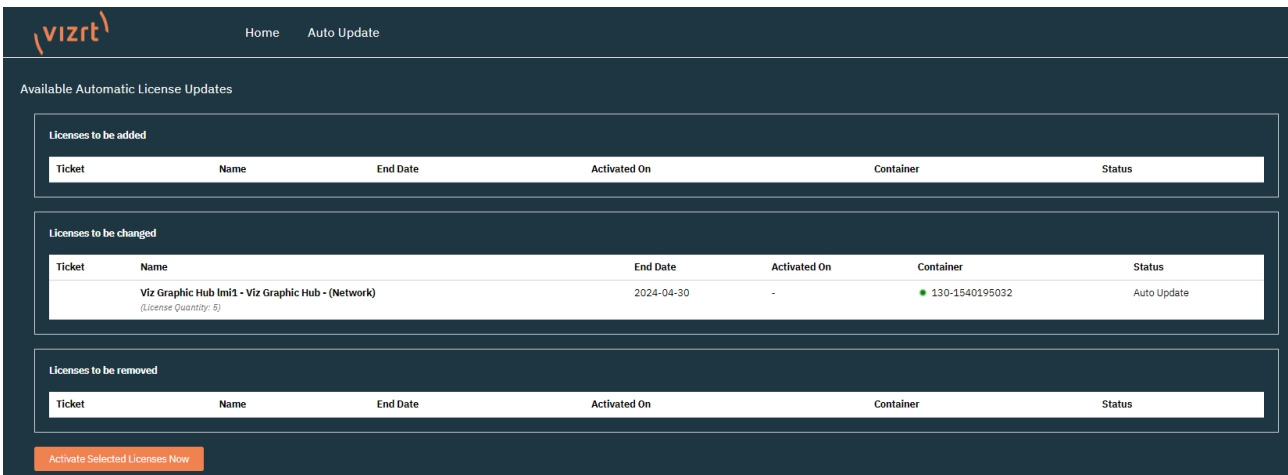

The Auto Update checks the locally installed CodeMeter Runtime for connected Software Containers and WIBU Dongles. Detected Containers and Dongles are displayed below the information text. If multiple are detected, the drop-down menu can be used to select the Container or Dongle that needs to be updated. Pressing **Check License Update** searches for available updates for the Container or Dongle selected.

Info: The Auto Update function checks if there were any changes to the expiration date or the quantity since the last license update. In addition, features that were removed are also detected and removed from the container or dongle.

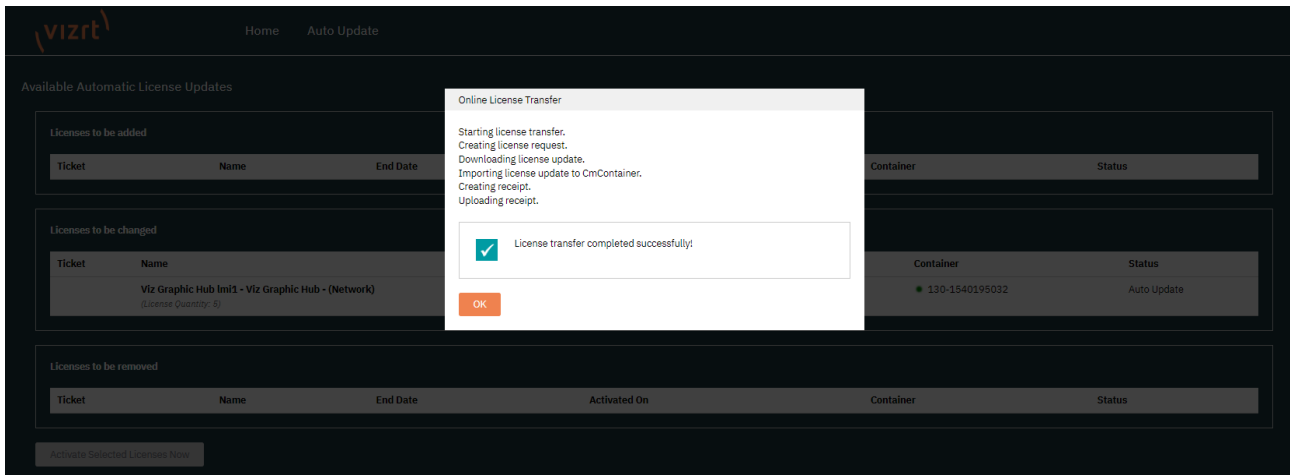

When an Auto Update is detected a short summary is displayed. This summary shows the licenses that are going to be added, changed and removed.

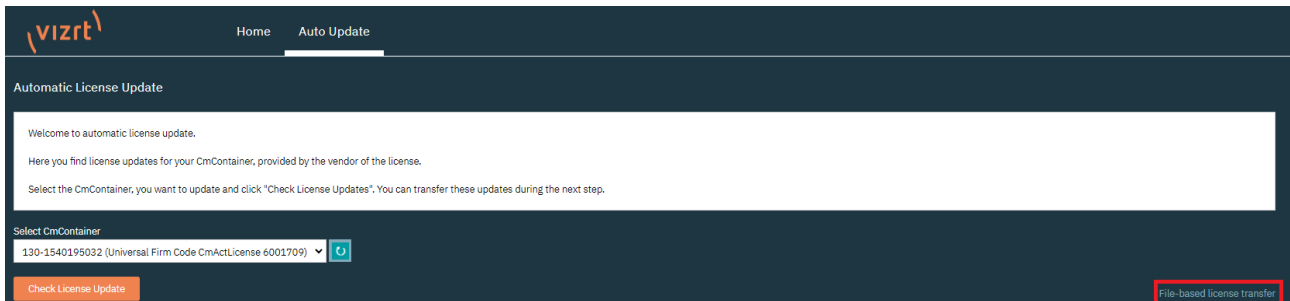

Info: In the screenshot above, the Quantity of the Graphic Hub License is going to be 5 after the Auto Update is completed, and the expiration date is set to April 30th 2024.

Clicking **Activate Selected Licenses Now** starts the Auto Update process on the Container or Dongle.

After a short time, the auto update is complete. Depending on the amount of changes, the process can take longer.

If a Container or Dongle is not located in the machine the Auto Update is executed, the Offline Activation can be used. To select the Offline Activation for Auto Update click on **File-based license transfer**.

After that, the Offline Activation can be executed as documented in the [Offline Activation](#) section.

4.1.4 Troubleshooting

If you encounter any issues in the license portal, please use the Vizrt Community Portal (<https://community.vizrt.com>) and open a support case stating the issue.

4.2 Licenses

The licenses page provides an overview of licenses of the account the user is assigned to. The licenses are sorted by ticket ID showing all features each ticket has assigned.

The screenshot shows the 'Licenses' page in the Vizrt interface. It features a search bar, a table with columns for Ticket, Name, Order ID, QTY, End Date, Activated On, Container, and Status, and pagination controls at the bottom. The table lists various license features such as 'V3 TriCaster Now - TriCaster Now Bridge - (Network)' and 'Viz Engine lmi1 - 4K Video Enablement - (Network)'.

Ticket	Name	Order ID	QTY	End Date	Activated On	Container	Status
4V63S-2M97P-8BAS2-U373C-LGQ6C (5)							
4V63S-2M97P-8BAS2-U373C-LGQ6C	V3 TriCaster Now - TriCaster Now Bridge - (Network)		4	2025-01-25	-		Available
4V63S-2M97P-8BAS2-U373C-LGQ6C	V3 Viz Arena - Developer Features - (Network)		3	2090-12-31	-		Available

B4EW6-KH694-N279S-7RY33-U226H	Viz Engine lmi1 - Chroma FX - (Network)		1	2025-03-01	2024-03-04 UTC	130-3874608740	Activated

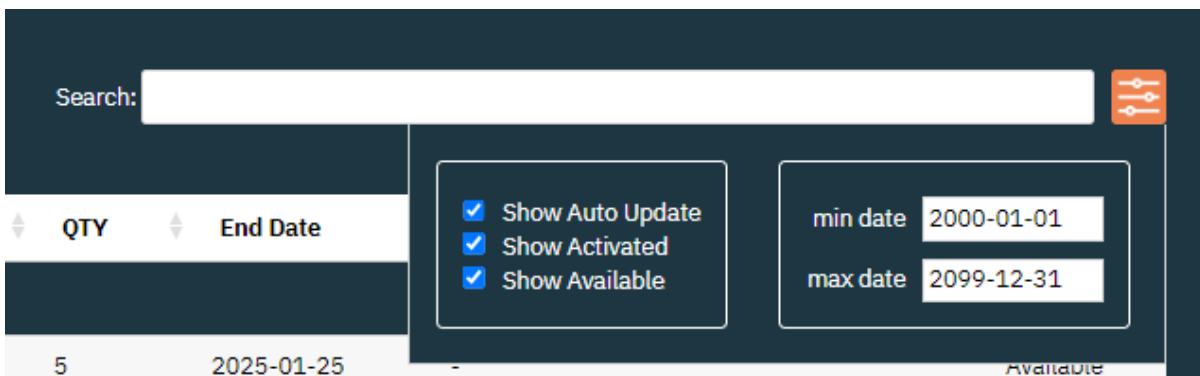

Column Name	Description
Ticket	This column displays the license Ticket ID. One Ticket can hold multiple license features.
Name	This column describes the name of different license features. The license features enable different features of Vizrt products. License features have two attributes: Expiration Date and Quantity.
Order ID	This column shows the Order ID the license belongs to.
QTY	The Quantity column displays how often a license feature is licensed on the ticket.
End Date	This column displays the expiration date of the license features.
Activated On	This column displays the activation date of a license feature.

Column Name	Description
Container	This column displays the Software Container or Dongle the license feature is applied on.
Status	This column displays the current state of a license feature.

The columns can be filtered alphabetically using the arrow buttons on the column title. Columns can be hidden by clicking the **Column visibility** button on the top left.

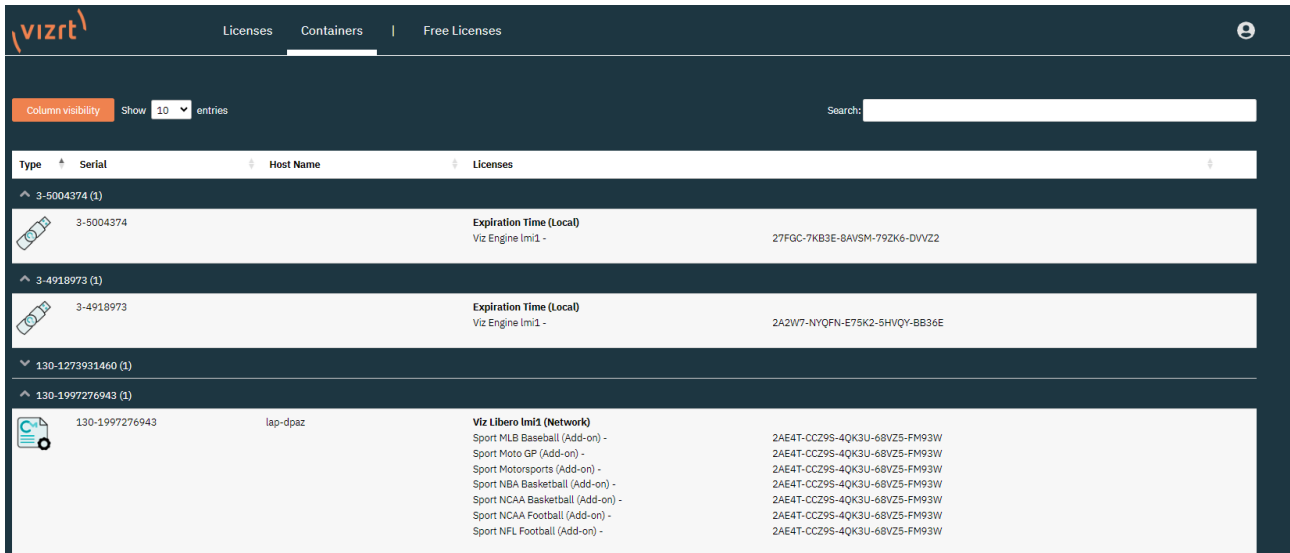

It is possible to select how many **entries per page** should be displayed. You can use the **search bar** to search the individual columns.

With the option field on the top right, you can filter license features according to date or specify certain states of licenses.

4.3 Containers

The containers page shows the currently used license containers. This means that all license dongles that hold a license ticket of the account the user is assigned to, are displayed.

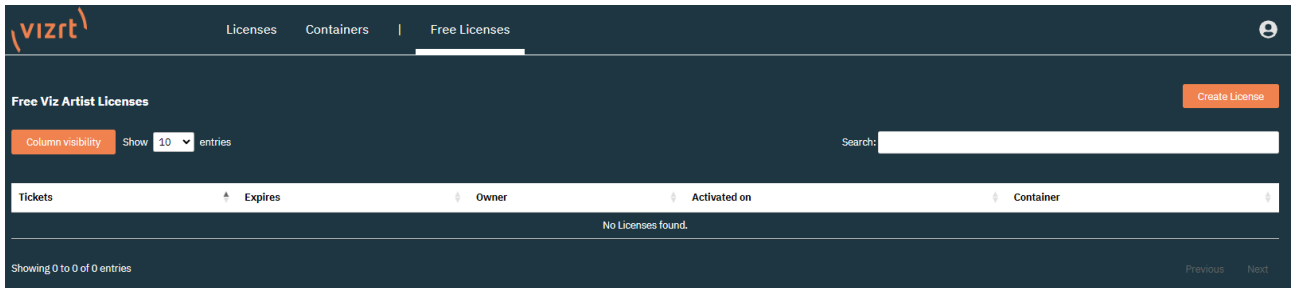

Column	Description
Type	This column displays the type of container that the license ticket is applied on. There are currently 3 types of Containers: Local Software Container, USB Dongle, Smartbind_Loose Container (used for VMs and Cloud instances).
Serial	This column displays the serial number of the Container or Dongle.
Host Name	This column displays the Host Name of the computer the Software Container is located. This does not work for USB dongles.
Licenses	This column displays the License features and the tickets they originate from.

The columns can be filtered alphabetically using the arrow buttons on the column title. Columns can be hidden by clicking the **Column visibility** button on the top left.

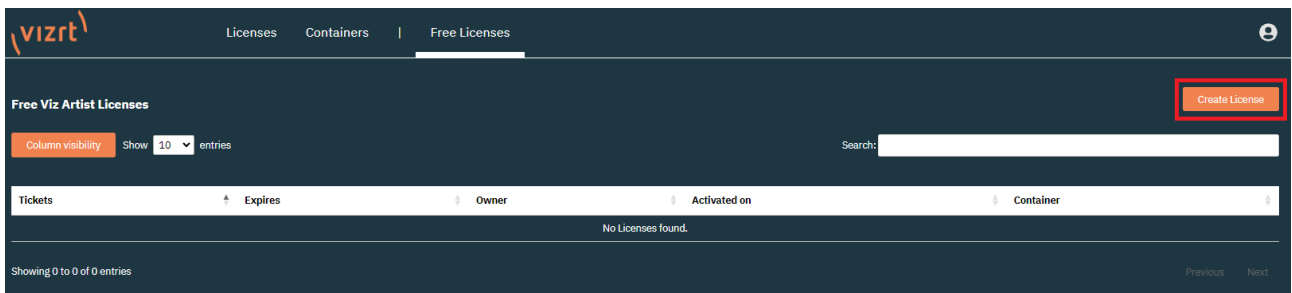

It is possible to display more than ten entries per page. You can use the search bar to search the individual columns.

4.4 Free Licenses

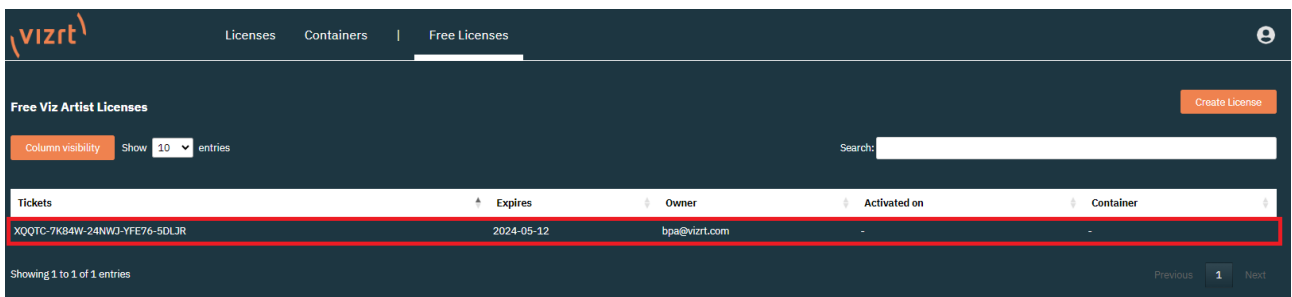

Here you are able to create Free Licenses for private or educational use. Currently this option is available for Free Viz Artist.

To create your own free license, click on **Create License**.

After a few seconds the license ticket is shown.

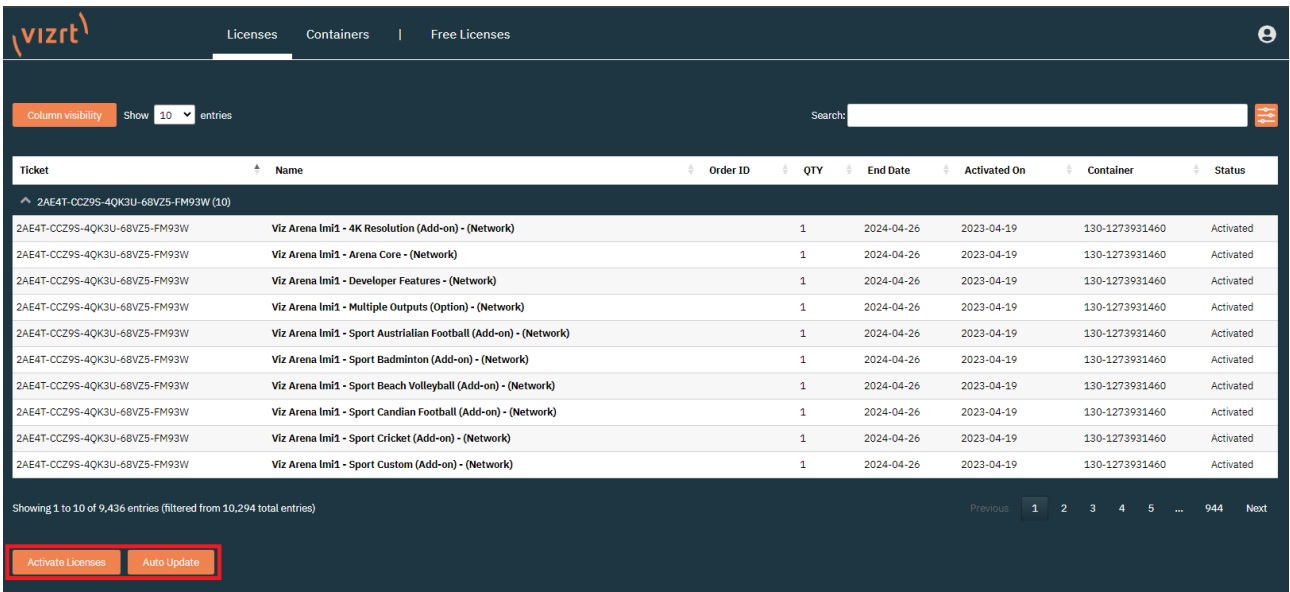

After creating a license, they are visible on the [Licenses](#) and can be activated.

4.5 Online License Activation

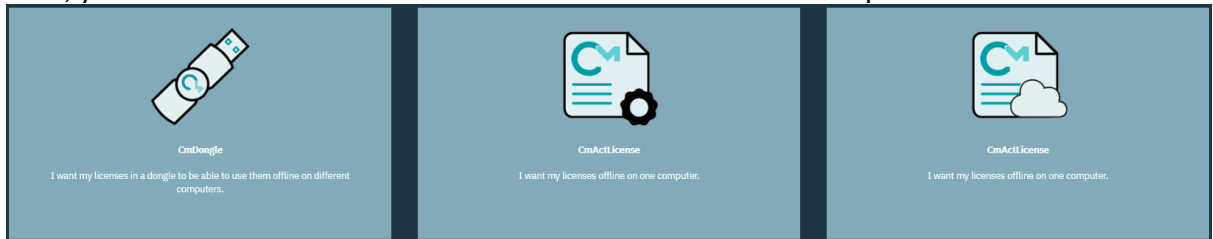

4.5.1 Activating a License using Online Activation

You can activate a new license ticket on a Dongle, Software Container or a Smartbind_Loose Container.

On the [licenses page](#), below the license information, there are the **Activate Licenses** and **Auto Update** buttons.

1. To start the license activation click the **Activate Licenses** button.
2. Next, you can select the destination of the license. These are the options available:

Container Type	Description
CmDongle	Activates the license on a USB Dongle.
CmActLicense local	Activates the license on a local Software Container.
CmActLicense Smartbind Loose	Activates the license on a Software Container in a Cloud or VM environment.

Info: The Smartbind Loose Container type is bound to a specific permission which needs to be enabled per user and is not enabled by default. This Container type is used to create a Software Container in a Cloud or VM Environment.

- After selecting a container, the next page displays all licenses currently available for activation. The table displays all licenses available for activation, including expiration date and quantity.

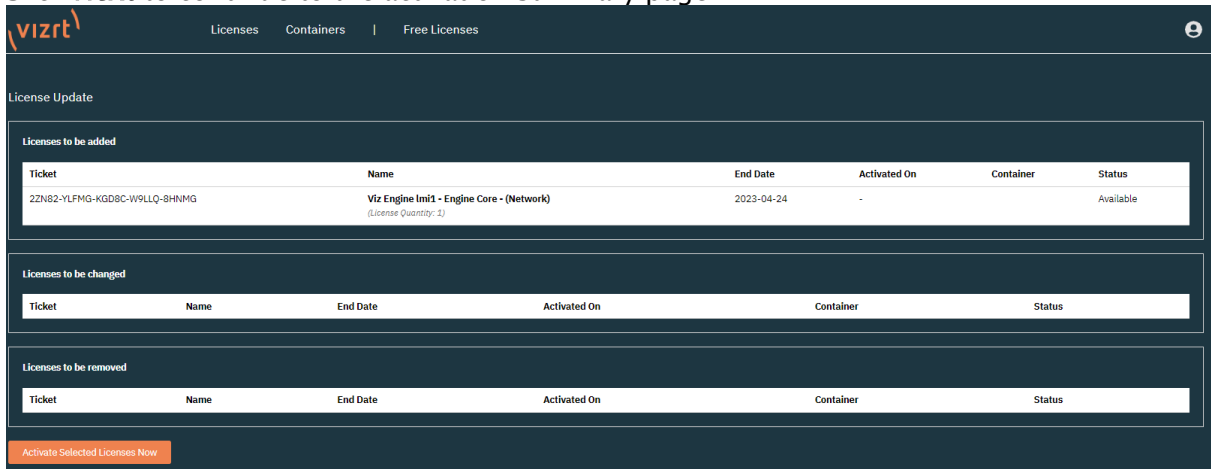

The screenshot shows the 'Available Licenses' page in the Vizrt interface. At the top, there are navigation tabs for 'Licenses', 'Containers', and 'Free Licenses'. Below the header, there's a search bar and a 'Column visibility' button. The main content is a table with the following columns: Ticket, Name, Order ID, QTY, End Date, Activated On, Container, and Status. The table contains 10 rows of license entries, each with a checkbox in the 'Ticket' column. Below the table, there are pagination controls showing 'Showing 1 to 10 of 8,825 entries' and a 'Next' button. There is also a 'Select CmContainer' dropdown menu and a 'Get CmContainer automatically' button.

The **Column visibility** allows you to select or deselect the columns in the table. This can be used for better visibility. With the **Search** field you can search for ticket IDs or License features.

Tip: It is recommended to always use the search field, for the ticket ID to not mistakenly activate unwanted license features.

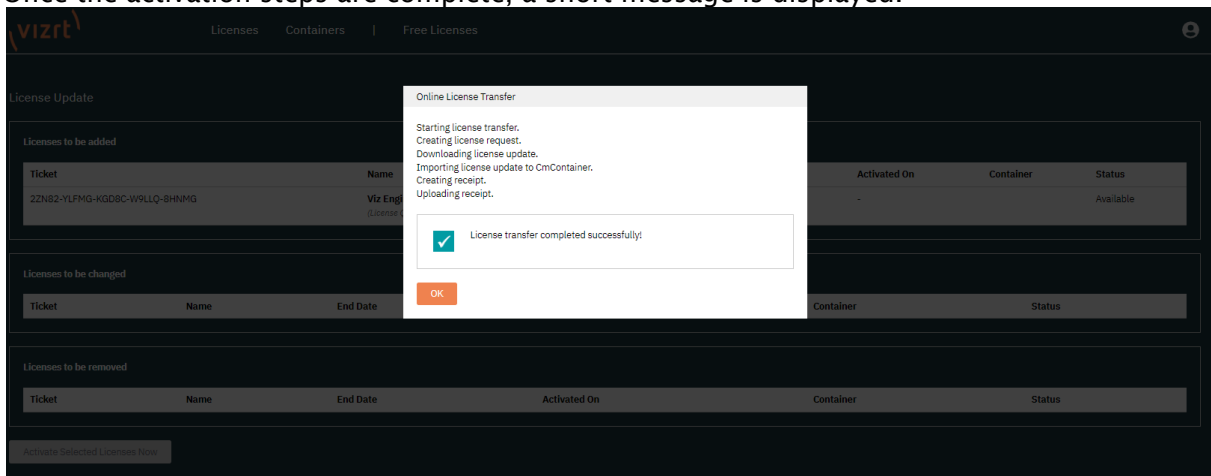

- Using the check-box in the first column, select the features to activate.
- Once the features are selected, you can activate them on a new container (created automatically in the next step), or select an existing container to add the licenses to.

- Click **Next** to continue to the activation Summary page.

The summary page shows the licenses that are going to be added, changed or removed. For the activation process, licenses are added.

- Click **Activate Selected Licenses Now** to activate the licenses.
- Once the activation steps are complete, a short message is displayed.

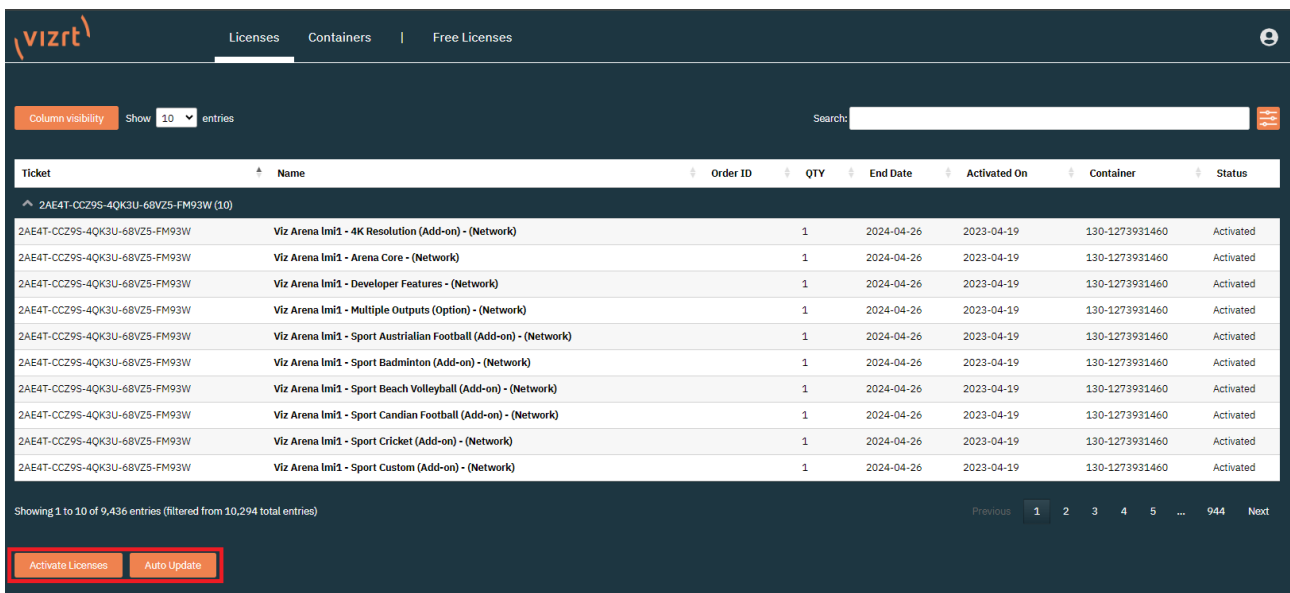

- Pressing **OK** returns the portal to the [Licenses](#).

4.6 Offline License Activation

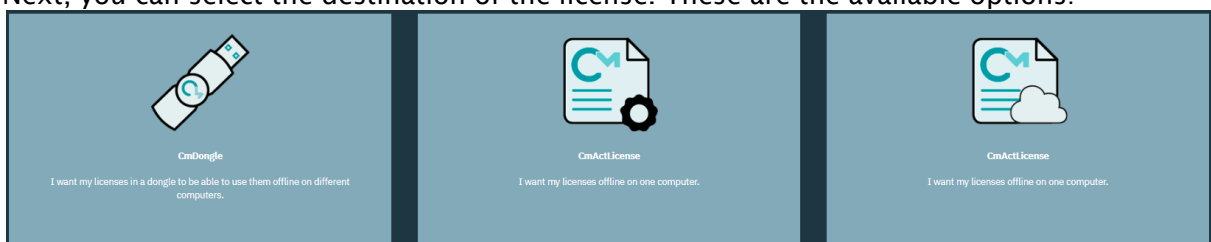

4.6.1 Activating a License using Offline Activation

With the offline license activation, you can activate a license in an environment that does not have internet access. However, it is required to use one computer with internet access in parallel to allow a file transfer between the Vizrt License Portal and the offline environment.

On the [licenses page](#), below the license information, there are the **Activate Licenses** and **Auto Update** buttons.

1. To start the license activation click the **Activate Licenses** button.
2. Next, you can select the destination of the license. These are the available options:

- In this view, instead of selecting and activating the available licenses directly, click **File-based license transfer**.

The screenshot shows the 'Available Licenses' section of the Vizrt interface. At the top, there are navigation tabs for 'Licenses', 'Containers', and 'Free Licenses'. Below the tabs, there's a search bar and a 'Column visibility' button. A table lists various licenses with columns for Ticket, Name, Order ID, QTY, End Date, Activated On, Container, and Status. The table contains 10 rows of licenses, all with a quantity of 1 and an end date of 2024-04-24. Below the table, there's a 'Showing 1 to 10 of 8,824 entries' indicator and a pagination control. At the bottom, there's a 'Select CmContainer' dropdown menu and a 'Next' button. A red box highlights the 'File-based license transfer' button in the bottom right corner.

Ticket	Name	Order ID	QTY	End Date	Activated On	Container	Status
22N82-YLFMG-KGD8C-W9LLQ-8HNMG	Viz Arena Im1 - Sport Australian Football (Add-on) - (Network)		1	2024-04-24	-		Available
22N82-YLFMG-KGD8C-W9LLQ-8HNMG	Viz Arena Im1 - Sport Badminton (Add-on) - (Network)		1	2024-04-24	-		Available
22N82-YLFMG-KGD8C-W9LLQ-8HNMG	Viz Arena Im1 - Sport Beach Volleyball (Add-on) - (Network)		1	2024-04-24	-		Available

22N82-YLFMG-KGD8C-W9LLQ-8HNMG	Viz Arena Im1 - Sport Horseracing (Add-on) - (Network)		1	2024-04-24	-		Available
22N82-YLFMG-KGD8C-W9LLQ-8HNMG	Viz Arena Im1 - Sport IHF Handball (Add-on) - (Network)		1	2024-04-24	-		Available

- The offline activation follows the same steps as the online activation process, but requires to manually transfer the files between the license portal and the remote computer with the license container. As a first step, it is required to select the features that should be activated.

You can filter the data columns using the **Column Visibility** button and search for tickets or features using the **Search** field.

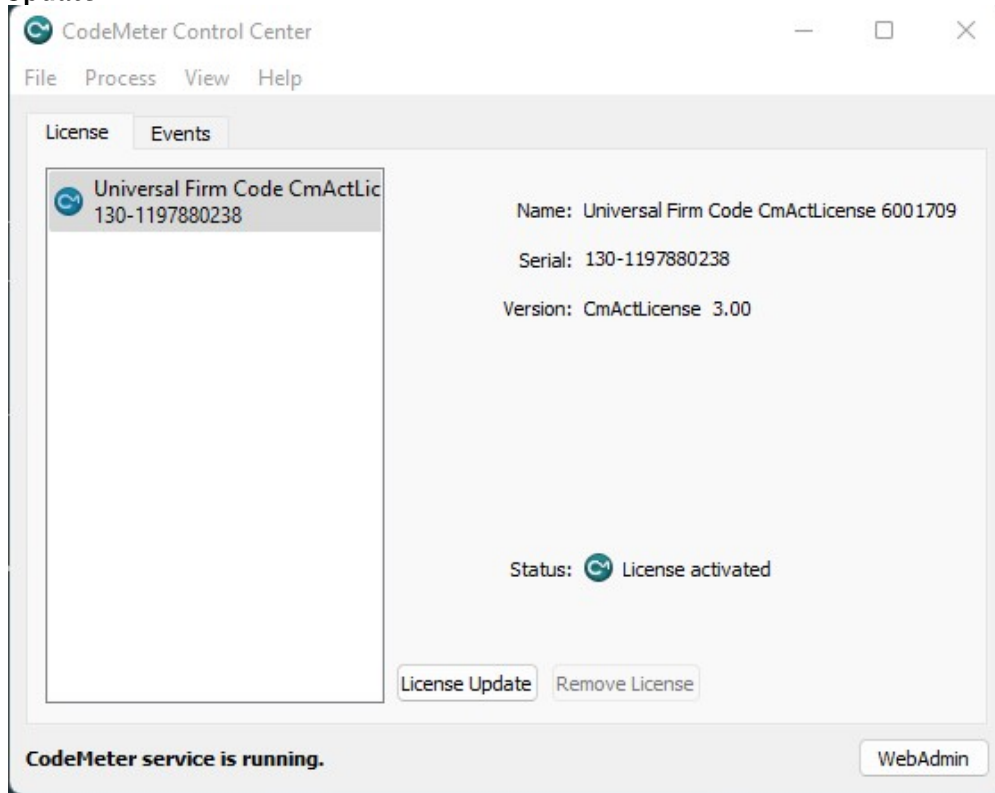

Below the data table it is possible to either, select a Container that is already known to the organization (which means there is already another license of this account applied), or start

the activation from a file from the local CodeMeter Control Center of the remote computer.

The screenshot shows the 'Available Licenses' section of the Vizrt Licensing Administrator. At the top, there are navigation tabs for 'Licenses', 'Containers', and 'Free Licenses'. Below the tabs, there are three main steps: 'Upload Request', 'Download Update', and 'Upload Receipt'. A search bar is present with the text 'Show 10 entries'. The main area contains a table of licenses with columns for Ticket, Name, Order ID, QTY, End Date, Activated On, Container, and Status. The table lists various sports-related licenses, all with a quantity of 1 and an end date of 2024-04-24. Below the table, there are options to 'Select an already used CmContainer' (currently set to 'No CmContainer selected') or to 'Pick a license request file (*.WibuCmRaC) of another CmContainer' (currently set to 'Keine ausgewählt'). A 'Start Activation Now' button is visible, along with a 'Direct license transfer' link. At the bottom, there are links for 'Show other licenses', 'Select binding', and 'Licenses'.

Ticket	Name	Order ID	QTY	End Date	Activated On	Container	Status
22N82-YLFMG-KGD8C-W9LLQ-8HNMG	Viz Arena Im1 - Sport Austrianian Football (Add-on) - (Network) <small>(License Quantity: 1)</small>		1	2024-04-24	-		Available

- In the remote computer open the CodeMeter Control Center. This can be done by opening the Windows Search and searching for **CodeMeter Control Center**. Select the Dongle or Software Container the license should be activated on and click **License**

Update.

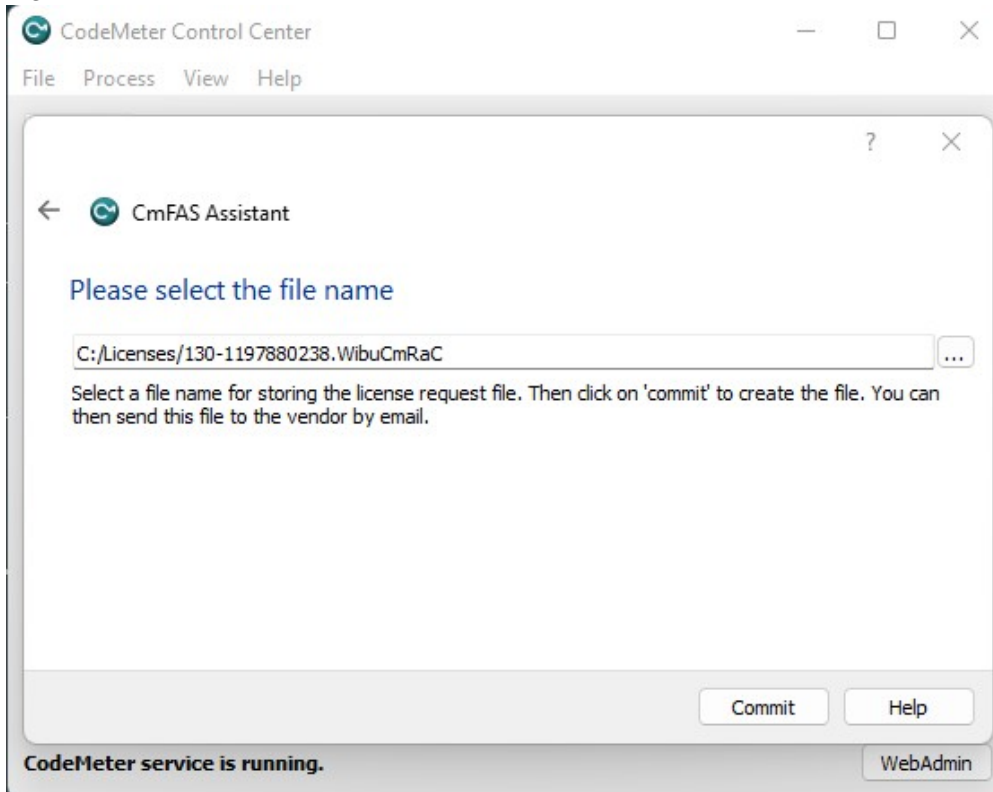

Info: To generate a Software Container on a local machine, use the Offline Licensing Helper Tool that can be downloaded from the [Accounts](#) page of the license portal.

Warning: It is not possible to use the Offline Licensing Helper to create a Software container on a VM or Cloud environment. For that, please use the [Online activation](#) in any case.

- After the welcome message, select **Create license request** and click next.

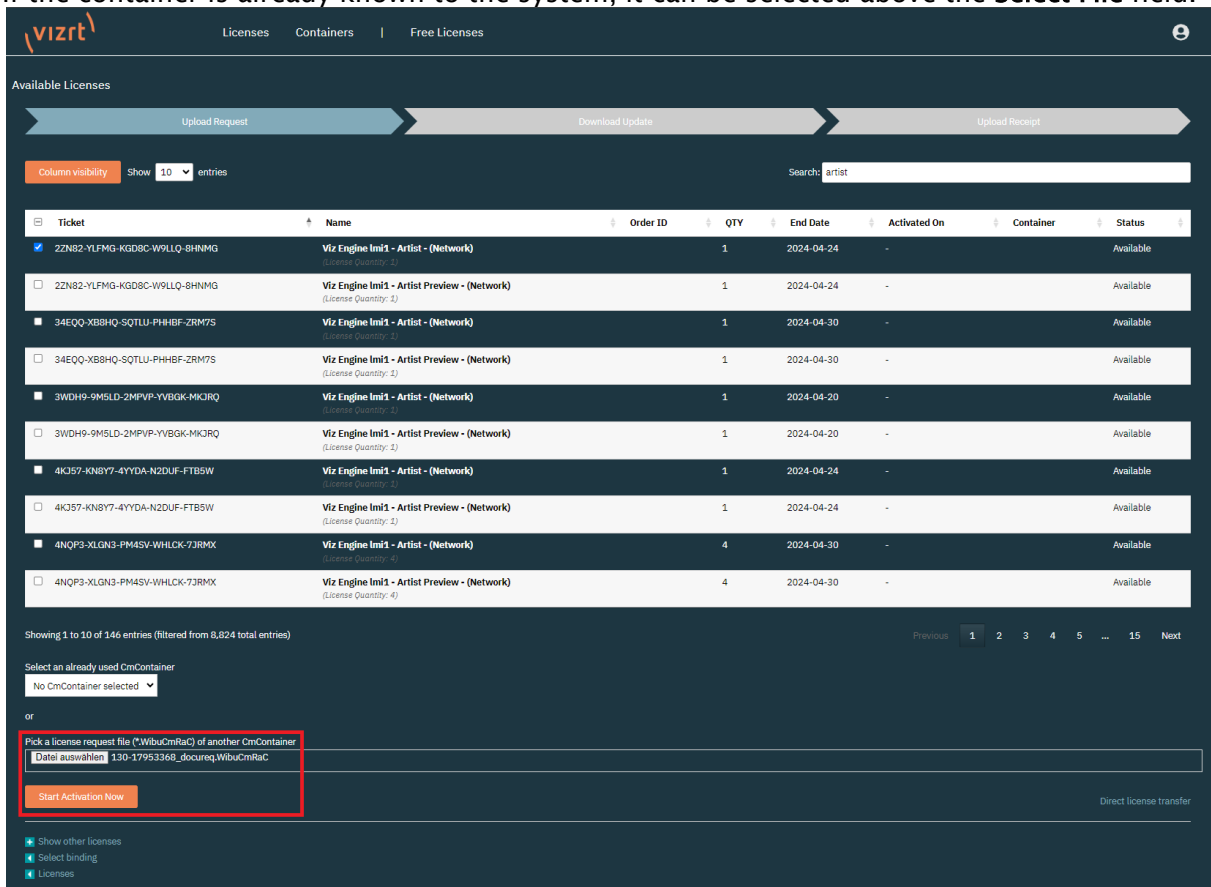

- Select the path where the Request file should be stored and click **Commit** to generate the file.

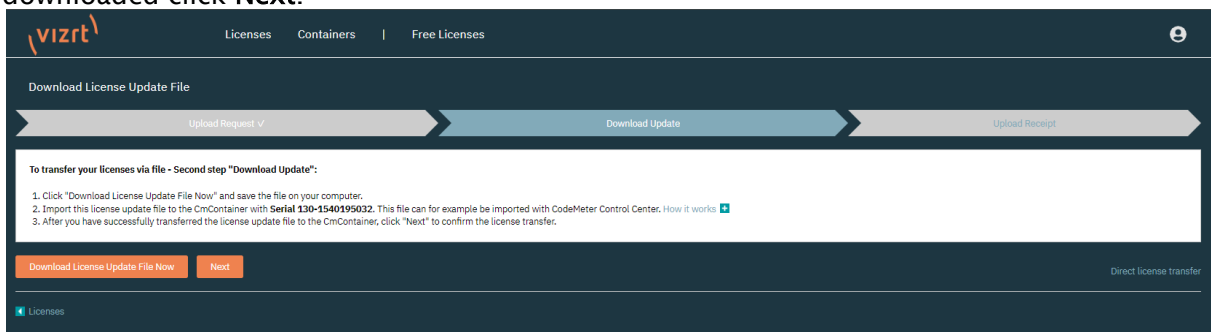

- Copy the created file to the computer with the license portal open, and upload it using **Select File**. Click **Start Activation Now**.

If the container is already known to the system, it can be selected above the **Select File** field.

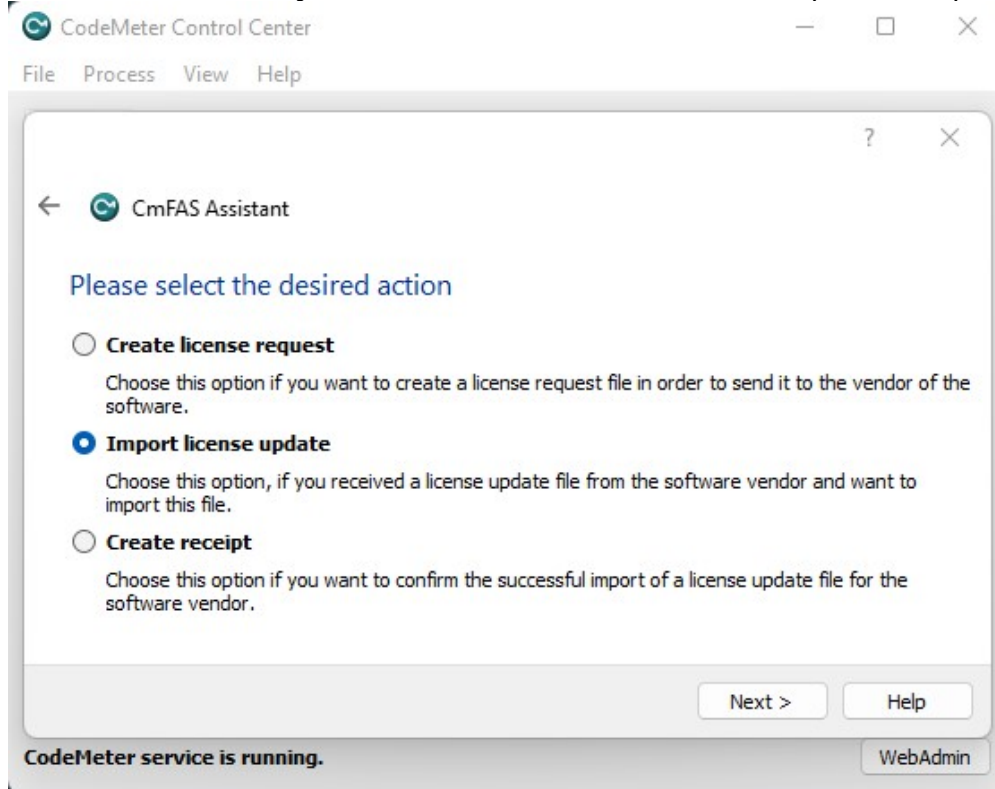

- Once the file is successfully uploaded, the portal continues to the next interface. Click **Download License Update File Now** to download the License Update file. Once the file is downloaded click **Next**.

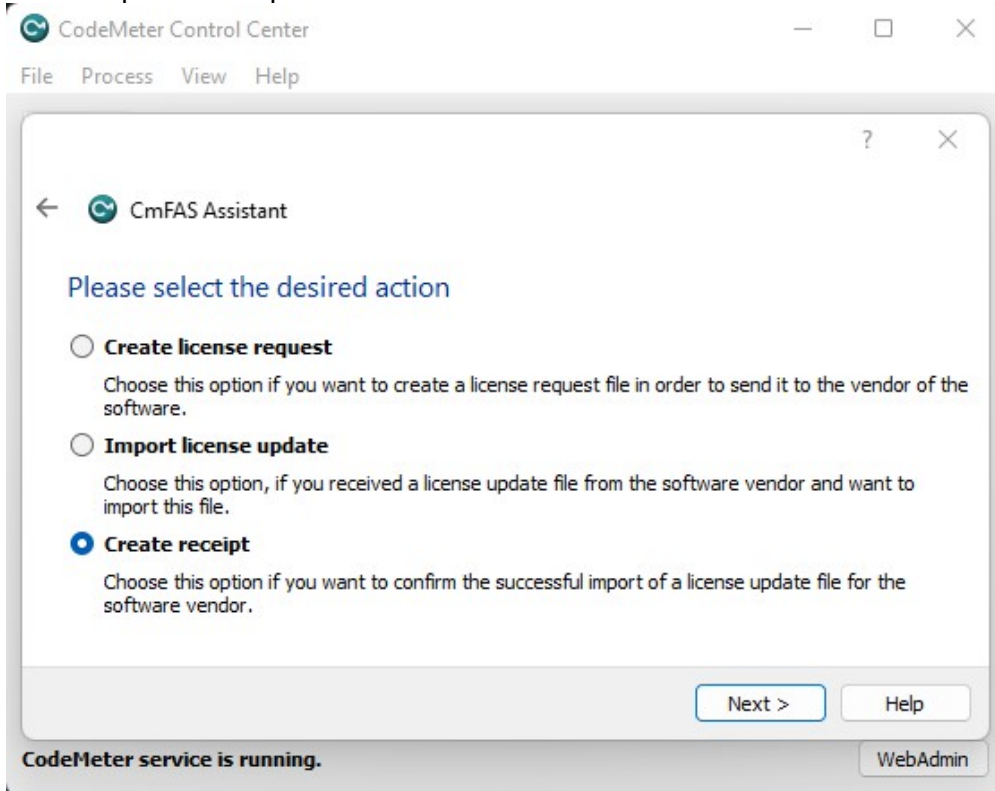

- Copy the downloaded License Update file to the remote computer and open CodeMeter Control Center. Click **License Update** again and then select **Import license update**.

Select the file that has just been downloaded from the license portal and press **Commit**.

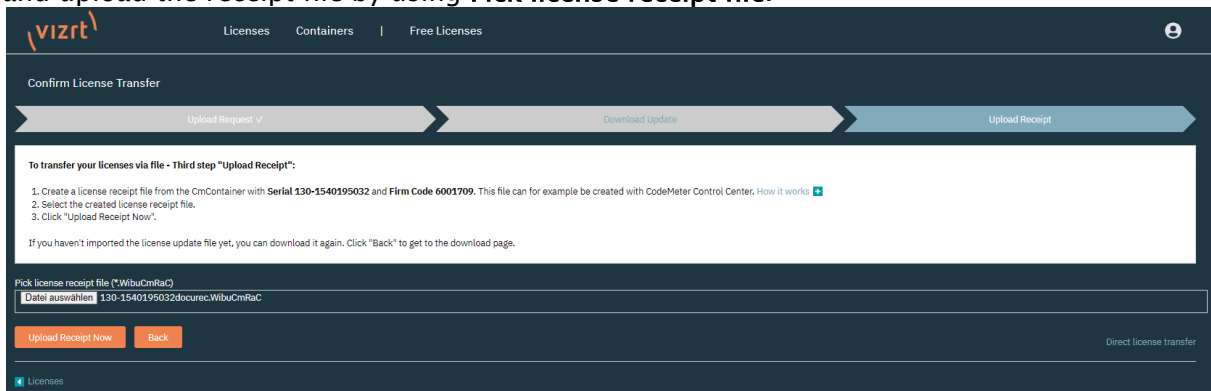

11. After successfully importing the update file, click **License Update** again and select **Create receipt**. Choose the path where the receipt file should be saved and press **Commit**.

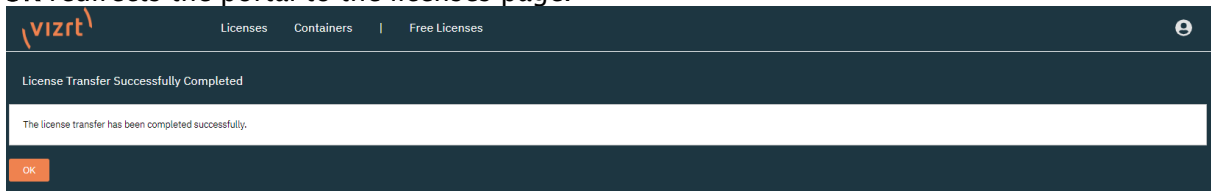

The receipt file is required to confirm if the license activation was successful.

- Copy the receipt file from the remote computer to the one with the license portal still open, and upload the receipt file by using **Pick license receipt file**.

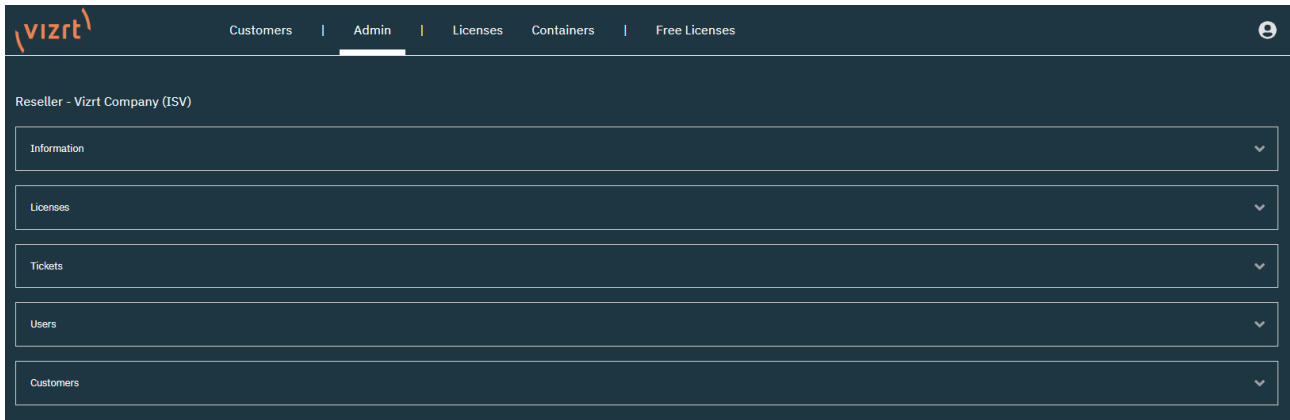

- Once uploaded, click **Upload Receipt Now**. This finishes the activation of the license. Clicking **OK** redirects the portal to the licenses page.

4.7 Admin

The Admin Page allows administrator users of the license portal to manage licenses and tickets of their account and all of its child accounts. The administrator access is tied to a permission which can be granted to individual users upon request.

The Account name is displayed, and the information is separated in five different sections.

Section	Description
Information	Provides information about the account the logged in user is assigned to.
Licenses	Displays all licenses of the account.
Tickets	Displays all tickets of the accounts.
Users	Displays the users of the account.
Customers / Organizations	Displays the Child Accounts.

4.7.1 Information

The Information tab displays the name, description, the date it was created and the maintenance period of the account. The name is the account number used by the system, while the description displays the account name.

Reseller - Vizrt Company (ISV)

Information	
Name	1
Description	Vizrt Company (ISV)
Created	2022-09-02
Maintenance Period (End)	2025-04-01

Licenses

Tickets

Users

Customers

i Info: The Maintenance Period is written on each license ticket and allows customers to use Vizrt Software Products that were released before that date. The Maintenance Period within the portal is updated according to the Support Contract of an account, this is not directly reflected on licenses that have already been applied. To use the latest Vizrt Software Products, the applied licenses need to be update with the latest maintenance period.

4.7.2 Licenses

The licenses section provides the same information as the [Licenses](#) tab but for Administrator users.

The screenshot shows the 'Admin' tab in the Vizrt interface. Under the 'Licenses' section, there is a table with the following columns: Name, Ticket, Creator, Order ID, Creation Date, Units, Usage (days), End Date, QTY, Cancellation Until, Activation Date, CmContainer, and Status. The table lists several licenses, including 'Data Center - Data Center Core - (Network)', 'PMO - phantasy item - (Network)', and 'V3 3Play by Viz Now - 3Play by Viz Now - (Network)'. At the bottom of the table, there is a 'Manage all Licenses' button.

Name	Ticket	Creator	Order ID	Creation Date	Units	Usage (days)	End Date	QTY	Cancellation Until	Activation Date	CmContainer	Status

With the **Manage all Licenses** button, Administrators can activate the licenses from the Admin tab. This button takes you to the Activation Page for [Online License Activation](#) and [Offline License Activation](#).

For accounts that also have an account hierarchy, all available tickets from the Parent Account and Child Accounts are available for activation.

4.7.3 Tickets

The Ticket section allows users to see the individual tickets and assign them to specific users. The default value is **Public** which means that every user of the current account can access the ticket. It is also possible to either assign a ticket to administrator users only, or to an individual user.

The screenshot shows the 'Licenses' section of the Vizrt Admin interface. At the top, there are navigation tabs: Groups, Admin, Licenses, Containers, and Free Licenses. Below the navigation, there are expandable sections for Information, Licenses, and Tickets. The Tickets section is expanded, showing a table with the following data:

Ticket	Licenses	Type	Owner
27FGC-7K83E-BAVSM-792K6-DVZ2	Expiration Time - Viz Engine Im1 - Combination Feature Frameserver - ...	Public	Public (Every Member of this group)
29GW2-B7RUU-SUQ9P-UMPEP-U63UB	Permanent - Viz Engine Im1 - Combination Feature Frameserver - ...	Public	Public (Every Member of this group)
2A2W7-NVQFN-E79K2-5HVQY-BB36E	Expiration Time - Viz Engine Im1 - Combination Feature Frameserver - ...	Public	Public (Every Member of this group)
2AE4T-CCZ9S-4QK3U-68VZ5-FM93W	Viz Arena Im1 - 4K Resolution (Add-on) - (Network), ...	Public	Public (Every Member of this group)
2AT6D-TSX9P-2THYA-U6MDQ-3B6RL	Viz Engine Im1 - 4K Video Enablement - (Network), ...	Public	Public (Every Member of this group)
2EWUR-TT4JA-BTS9L-DCQ2W-NUU93	Expiration Time - Viz Engine Im1 - Preview Core - (Local), ...	Public	Public (Every Member of this group)
2MWVY-7QBPF-2EFBL-FHGD-R8C35	Expiration Time - Viz Engine Im1 - Preview Core - (Local), ...	Public	Public (Every Member of this group)
2WCFK-3265Y-ALSQC-627FR-N7YZ6	Viz Engine Im1 - 4K Video Enablement - (Network), ...	Public	Public (Every Member of this group)
2YR0G-3C76G-UDG9K-93L2W-HS9G4	Permanent - Viz Engine Im1 - Combination Feature Frameserver - ...	Public	Public (Every Member of this group)
2ZNS2-YLPMG-KGDBC-W9LLQ-8H8MG	Viz Engine Im1 - 4K Video Enablement - (Network), ...	Public	Public (Every Member of this group)

At the bottom of the table, it says 'Showing 1 to 10 of 174 entries' and there are pagination controls for 1, 2, 3, 4, 5, ..., 18, Next.

 **Tip:** Tickets are only shown in the licenses page of a user if the access permission is set to public or the ticket has been assigned to the individual user.

4.7.4 Users

In this section you can see which users are connected to the account. In addition to the email address, the user logged into the license portal, has its permissions displayed.

The screenshot shows the 'Users' section of the Vizrt Admin interface. At the top, there are navigation tabs: Customers, Admin, Licenses, Containers, and Free Licenses. Below the navigation, there are expandable sections for Information, Licenses, Tickets, and Users. The Users section is expanded, showing a table with the following data:

Email Address	Roles	Created	CmCloudContainer
bpa@vizrt.com	admin, Wibu_Admin, Wibu_SmartBindLoose, Wibu_Rehost, Wibu_Artist_Free, Wibu_SF_User	2024-03-13	Get Credential File

At the bottom of the table, it says 'Showing 1 to 1 of 1 entries (filtered from 11 total entries)' and there are pagination controls for Previous, 1, Next.

Info: The **CmCloudContainer** column and the **Get Credential File** button are not currently used, and are part of upcoming features of the Licensing Portal.

4.7.5 Customers

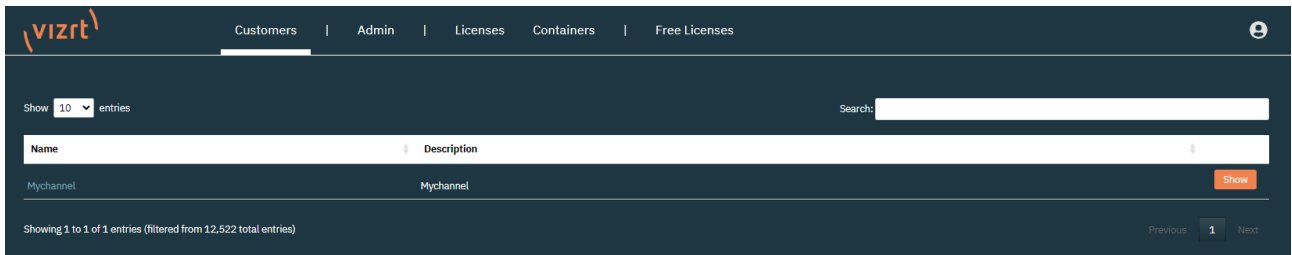

The customers section displays the child accounts of the current account. Clicking the **Show** button forwards to the Admin Page of the child account and provides the same functionality as described in the [Admin Page](#).

The screenshot shows the 'Customers' section of the Vizrt Licensing Portal. The top navigation bar includes 'Customers', 'Admin', 'Licenses', 'Containers', and 'Free Licenses'. The main content area is titled 'Reseller - Vizrt Company (ISV)' and contains several expandable sections: 'Information', 'Licenses', 'Tickets', 'Users', and 'Customers'. The 'Customers' section is expanded, showing a search bar with 'MyChannel' entered and a 'Show' button. Below the search bar is a table with columns 'Name' and 'Description'. The table contains one entry: 'Mychannel' under 'Name' and 'Mychannel' under 'Description'. At the bottom of the table, it says 'Showing 1 to 1 of 1 entries (filtered from 12,521 total entries)'. There are also 'Previous' and 'Next' navigation buttons.

Name	Description
Mychannel	Mychannel

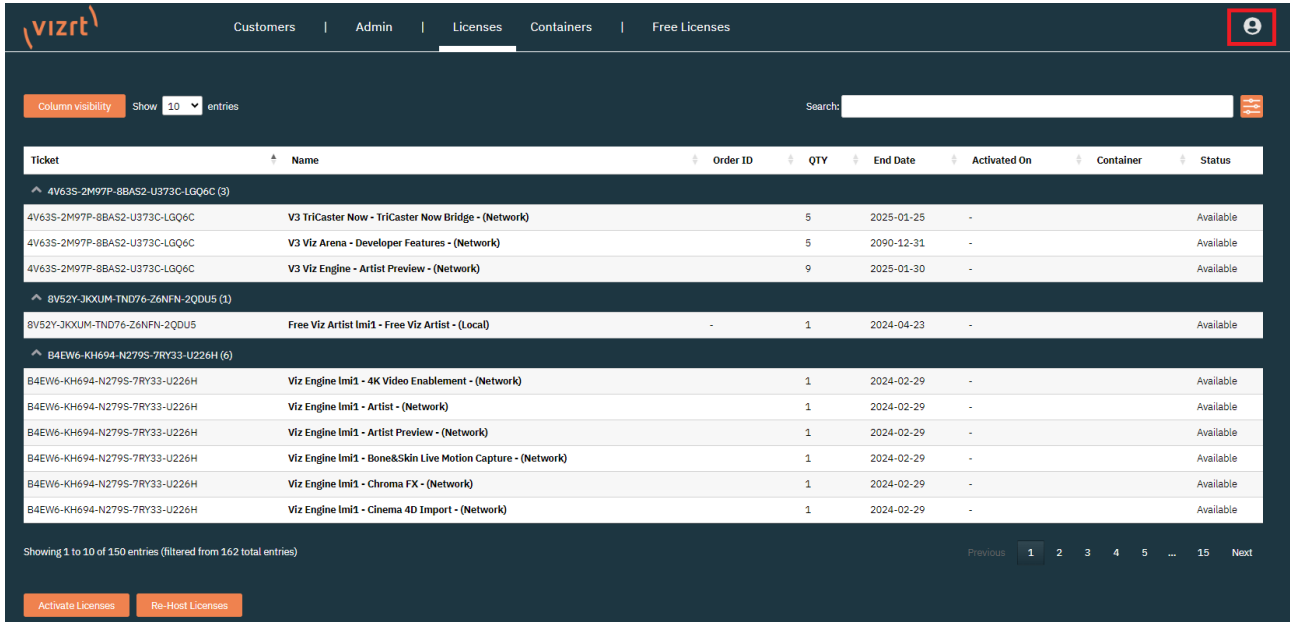

4.8 Customers

The customers section displays the child accounts of the current account. Clicking the **Show** button forwards to the Admin Page of the child account and provides the same functionality as described in the [Admin Page](#).

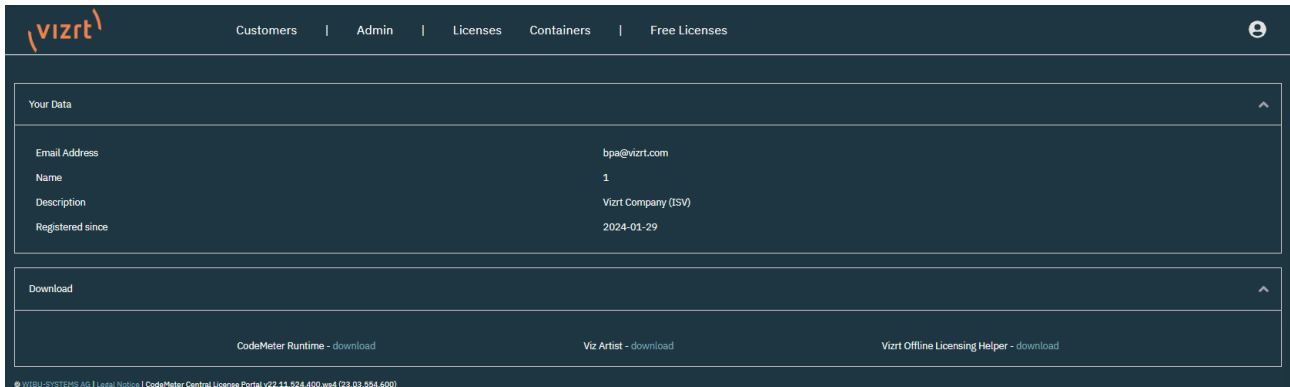

4.9 Account

To access the account information, click on the portrait symbol on the top right of the license portal.

Clicking this button, either forwards to the account information, or provides the option to log out of the license portal.

The account information provides all of the information about the user and account data:

Your Data	Description
Email Address	Email address of the current user.
Name	Account ID of the account the user is assigned to.
Description	Account name of the account the user is assigned to.

Your Data	Description
Registered since	Date of creation of the current user.
Download	Description
CodeMeter Runtime	WIBUs CodeMeter Runtime is required to run any Vizrt Software Product. Also required to run a license server. This installer is also shipped with all Vizrt Software bundles.
Viz Artist	Downloader for Viz Free Artist.
Vizrt Offline Licensing Helper	This tool is required for offline licensing activation. Please only use to create a container in case there is none on the machine. The other steps of the offline activation can be done like described here .

4.10 Re-Hosting

With Re-Hosting you can rehost an already activated license from a Dongle or Software Container back to the license portal. This enables flexibility in license usage and provides the option to move licenses between locations.

Re-Hosting licenses follows the same procedure as the license activation process and it allows [online](#) and [offline](#) workflow.

It is required to have an additional permission that can be requested from Vizrt for individual users.

If a user has the Re-Host permission enabled, a button is displayed below the licenses table on the [Licenses](#) page:

The screenshot shows the Vizrt Licenses page. At the top, there are navigation tabs: Customers, Admin, Licenses (selected), Containers, and Free Licenses. Below the navigation, there is a search bar and a 'Column visibility' dropdown set to 'Show 10 entries'. The main content is a table with the following columns: Ticket, Name, Order ID, QTY, End Date, Activated On, Container, and Status. The table is divided into two sections by expandable headers: '4V63S-2M97P-8BAS2-U373C-LGQ6C (5)' and 'B4EW6-KH694-N279S-7RY33-U226H (5)'. The first section contains five rows of licenses, and the second section contains five rows. At the bottom of the page, there are two buttons: 'Activate Licenses' and 'Re-Host Licenses', with the latter being highlighted by a red rectangular box.

Activate Licenses Re-Host Licenses

After clicking the **Re-Host Licenses** button, a list of licenses available for rehost is displayed. When using the offline version, the portal first redirects the interface to select the Dongle or Software Container the license should be rehosted from.

The screenshot shows the 'Re-Hostable Licenses - Select CmContainer' page. At the top, there is a navigation bar with 'Customers', 'Admin', 'Licenses', 'Containers', and 'Free Licenses'. Below the navigation bar, a message states: 'Several CmContainers with re-hostable license were found. Please select the desired CmContainer.' The main content area displays four license entries, each with a document icon, a license ID, and a list of features:

- License 130-2925769937:**
 - Re-Hostable Licenses:
 - V3 Viz Arena (Network)
 - Developer Features - 4V63S-2M97P-8BAS2-U373C-LGQ6C
- License 130-1540195032:**
 - Re-Hostable Licenses:
 - Viz Engine lmi1 (Network)
 - Artist - B4EW6-KH694-N279S-7RY33-U226H
 - Combination Feature - B4EW6-KH694-N279S-7RY33-U226H
 - Combination Feature DVI - B4EW6-KH694-N279S-7RY33-U226H
 - Combination Feature PicoZIP - B4EW6-KH694-N279S-7RY33-U226H
 - Combination Feature ND1 - B4EW6-KH694-N279S-7RY33-U226H
 - Engine Core - B4EW6-KH694-N279S-7RY33-U226H
 - SDI/IP OUT Channel - B4EW6-KH694-N279S-7RY33-U226H
 - SDI/IP Video Input Enablement - B4EW6-KH694-N279S-7RY33-U226H
 - Service Host Core - B4EW6-KH694-N279S-7RY33-U226H

 - Viz Engine lmi1 (Local)
 - Combination Feature Frameserver- (Network) - B4EW6-KH694-N279S-7RY33-U226H
- License 130-3874608740:**
 - Re-Hostable Licenses:
 - Viz Engine lmi1 (Network)
 - Chroma FX - B4EW6-KH694-N279S-7RY33-U226H
- License 3-4589751:**
 - Re-Hostable Licenses:
 - V3 Media Sequencer Engine (Network)
 - MSE Core - FAB5N-CK55V-4PYX8-GSC23-XWBA7

In the online version, the portal directs to the view below, where it is possible to select the features that should be rehosted.

 **Tip:** In this view it is possible to switch to the offline workflow by clicking on **File-based license transfer** on the lower right corner. Follow the same instructions as for the **offline license activation**.

Re-Hostable Licenses

To re-host licenses from one CmContainer to another CmContainer:

1. Make sure that the CmContainer with Serial **130-1540195032** is connected to this computer. If this CmContainer is not connected to this computer, connect it now and click "Rescan for CmContainers".
2. Select the licenses you want to re-host.
3. Click "Re-Host Selected Licenses Now".
4. After the successful deactivation of the selected licenses, you can activate them again in another CmContainer.

5 CodeMeter WebAdmin

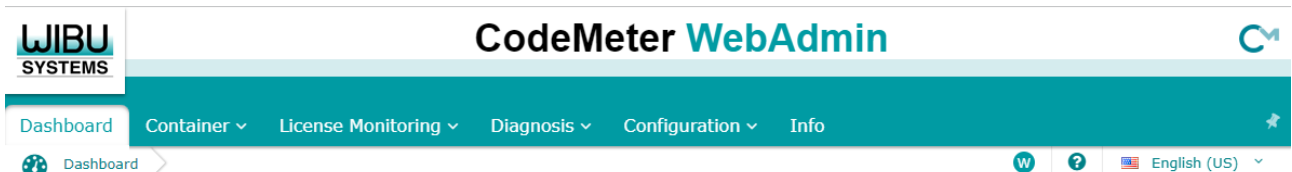

The CodeMeter WebAdmin is the user interface of the WIBU CodeMeter Runtime. It is used to manage local settings, review available licenses, setup a license server and troubleshooting. The WIBU CodeMeter Runtime is shipped with all Vizrt Software products and is also available for download in the [account tab](#) of the license portal.

To access the WebAdmin, open the CodeMeter ControlCenter and click on the **WebAdmin** button in the lower right corner.

Alternatively, the CodeMeter WebAdmin is accessible via URL: <http://localhost:22352/dashboard.html>.

Info: To access the WebAdmin of a remote computer, replace the localhost in the URL <http://localhost:22352/dashboard.html> with the IP address or the hostname of the remote computer. Please note that accessing the CodeMeter WebAdmin remotely needs to be enabled.

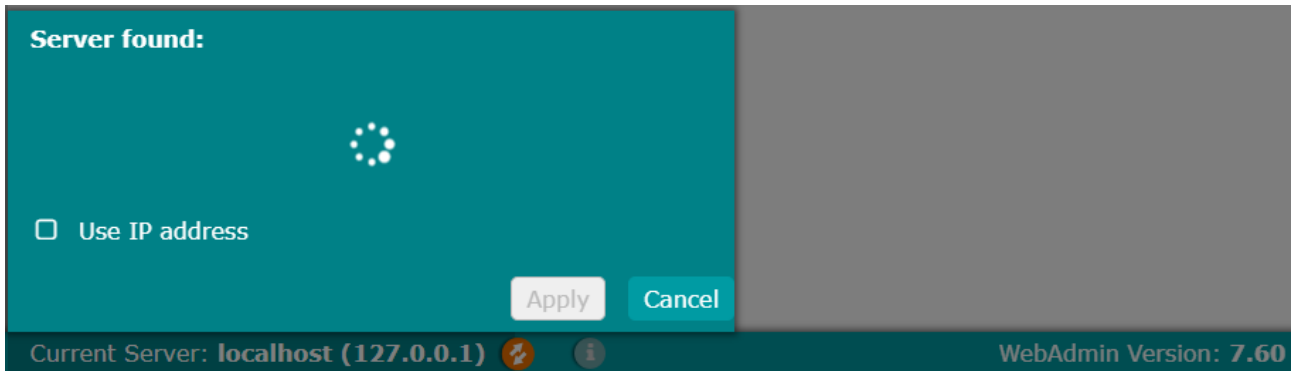

In the top menu bar of the CodeMeter WebAdmin, you have access to different information and settings, and the option to select a language. Clicking the question mark, opens WIBUs documentation and information about the exact page that is currently displayed in CodeMeter

WebAdmin.

The **W** symbol provides information regarding the connection. If it is Read-Only (**R**) or has permission to perform changes (**W**).

You can change between CodeMeter WebAdmins that are known to the network. To do so, select the **Current Server** option on the bottom bar of the page:

After scanning the network for available servers, the options are displayed, showing the hostname and IP address.

By clicking on the server and if the access is enabled, the page is forwarded to the CodeMeter WebAdmin of the server.

5.1 Configuration

The Configuration tab is used to configure settings for clients and network servers.

There are three main sections available: Basic, Server and Advanced. They can be selected by hovering over the Configuration tab.

Tip: For a more detailed description, click the question mark on top of the page to see the CodeMeter User Help.

- [Basic Configuration](#)

 - [Extra](#)

5.1.1 Basic Configuration

Server Search List

The Server Search List is used to configure a connection to a license server on a client.

The screenshot displays the CodeMeter WebAdmin interface. The top navigation bar includes the WJIBU SYSTEMS logo, the title 'CodeMeter WebAdmin', and a user profile icon. Below the navigation bar, a teal header contains the main menu items: Dashboard, Container, License Monitoring, Diagnosis, Configuration (selected), and Info. Under the Configuration menu, sub-items are shown: Basic Configuration, Server Search List (selected), Proxy, WebAdmin, and Backup. The main content area features a 'Server Search List' section with a list of servers. The first entry is '1. Automatic server search (255.255.255.255)'. Below the list is a '+ add new Server' button. At the bottom of the list area are 'Apply' and 'Restore Defaults' buttons. To the right of the list is a circular icon depicting two server racks connected by a line.

To add a new server to the list, click **add new Server** and provide the hostname or IP address of the license server.

When there are multiple servers added, it is possible to change the order. Per default, Vizrt Software products always check for available licenses on the first server in the list, before moving to the other servers.

Proxy

In this section the proxy preference can be selected.

WebAdmin

In the WebAdmin configuration, you can enable the read access to the CodeMeter WebAdmin from an external computer within the network range. In addition, it is possible to select the preferred protocol and authentication.

Basic Configuration WebAdmin English (US)

Server Search List Proxy WebAdmin Backup

Remote Read Access

- Allow
- Deny

Changes require restart of the CmWebAdmin service

Protocol Selection

- HTTP (sets authentication to none)
- HTTPS (with automatically created self-signed certificate)
- HTTPS (with custom certificate)

Required Authentication

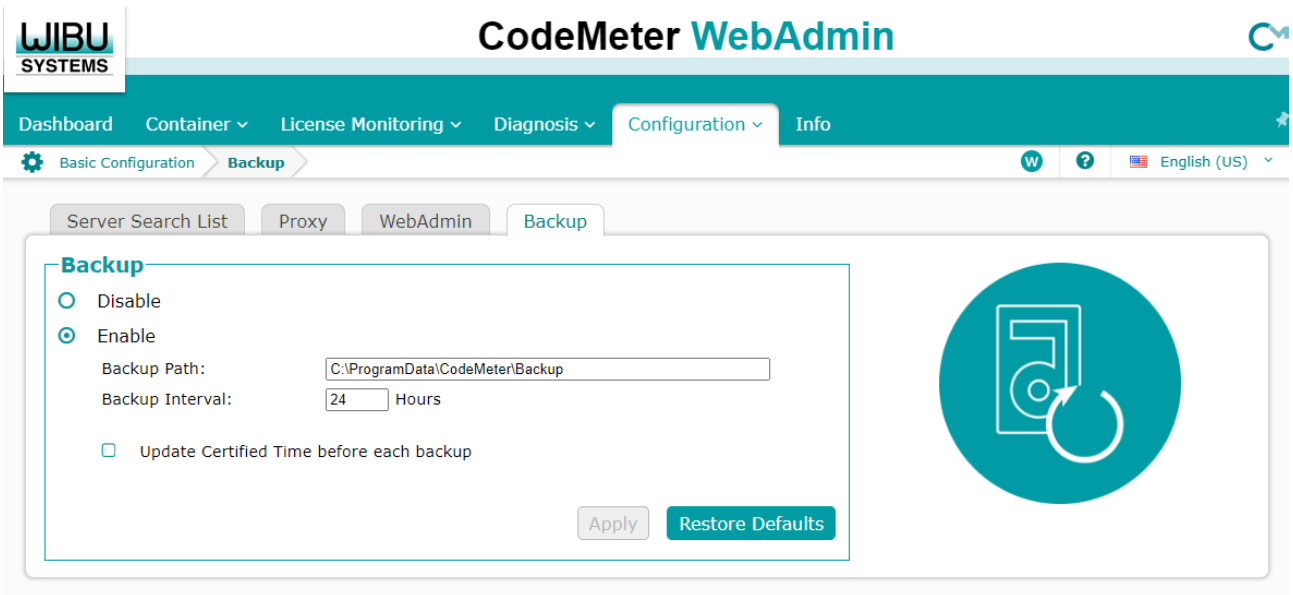

- None (No remote write access possible!)
- Write Access (requires HTTPS)
- Read and Write Access (requires HTTPS)

Apply Restore Defaults

Tip: It is recommended to allow the **Remote Read Access** on license servers at all times, to ensure clients can connect safely.

Backup

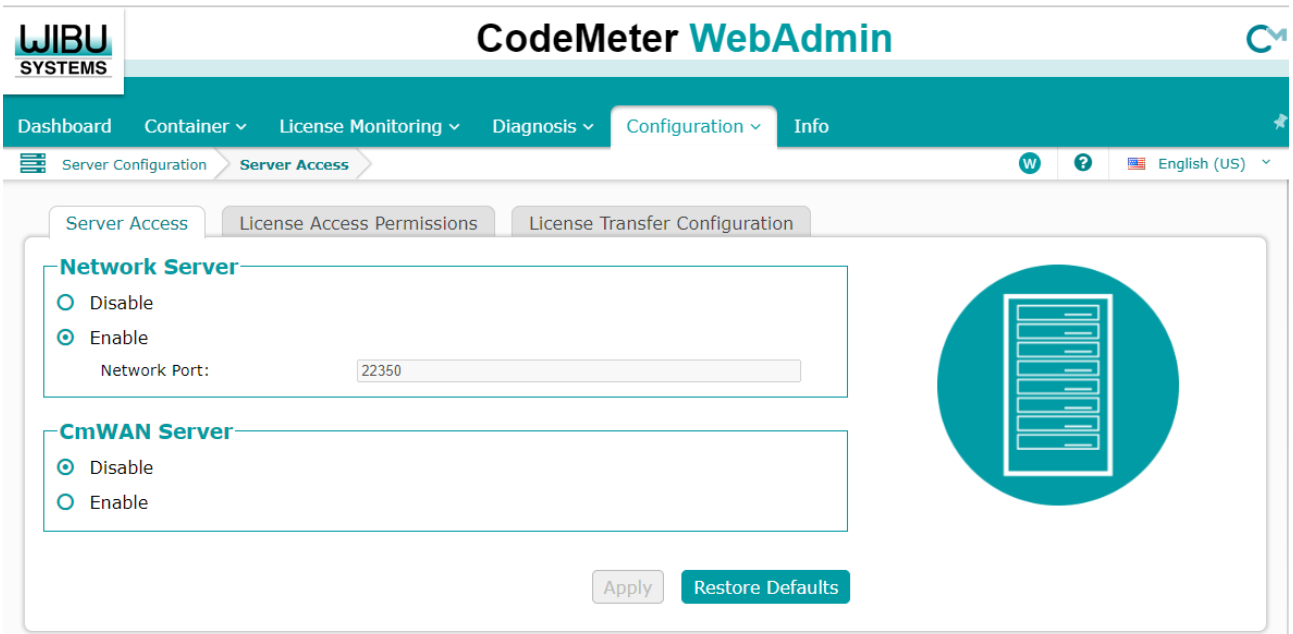

This option allows to define a backup for Dongle and Software Container data.

5.1.2 Server

Server Access

The Server Access is the main setting required to run a license server. This setting needs to be enabled to allow clients to connect to the license server and access licenses.

License Access Permissions

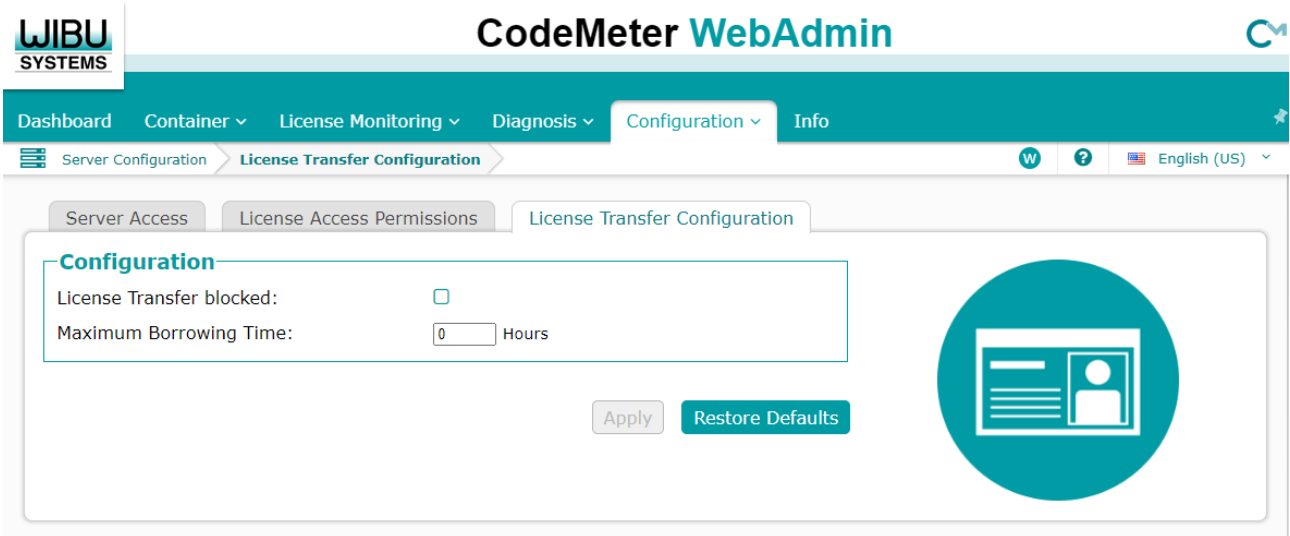

The License Access Permissions allows access to rules for licenses. It is possible to reserve licenses for specified clients using the IP address of the client. Reserved licenses on the server cannot be accessed by other clients.

The screenshot displays the CodeMeter WebAdmin interface. The top navigation bar includes 'Dashboard', 'Container', 'License Monitoring', 'Diagnosis', 'Configuration', and 'Info'. The 'Configuration' menu is expanded, showing 'Server Configuration' and 'License Access Permissions'. The 'License Access Permissions' page is active, with tabs for 'Server Access', 'License Access Permissions', and 'License Transfer Configuration'. The 'Mode' section has two radio buttons: 'Basic' (selected) and 'Advanced'. Below this, a message states: 'CodeMeter Server is currently running in License Access Permission Mode: **Basic**'. The 'Basic Mode Configuration' section contains a 'Clients' list (empty), 'Add' and 'Remove' buttons, and an 'Enable FSB Access' checkbox. At the bottom, there are 'Apply', 'Undo Changes', and 'Restore Defaults' buttons. A large teal circular icon with a white document and person symbol is on the right side of the configuration area.

License Transfer Configuration

In this section the license transfer can be configured.

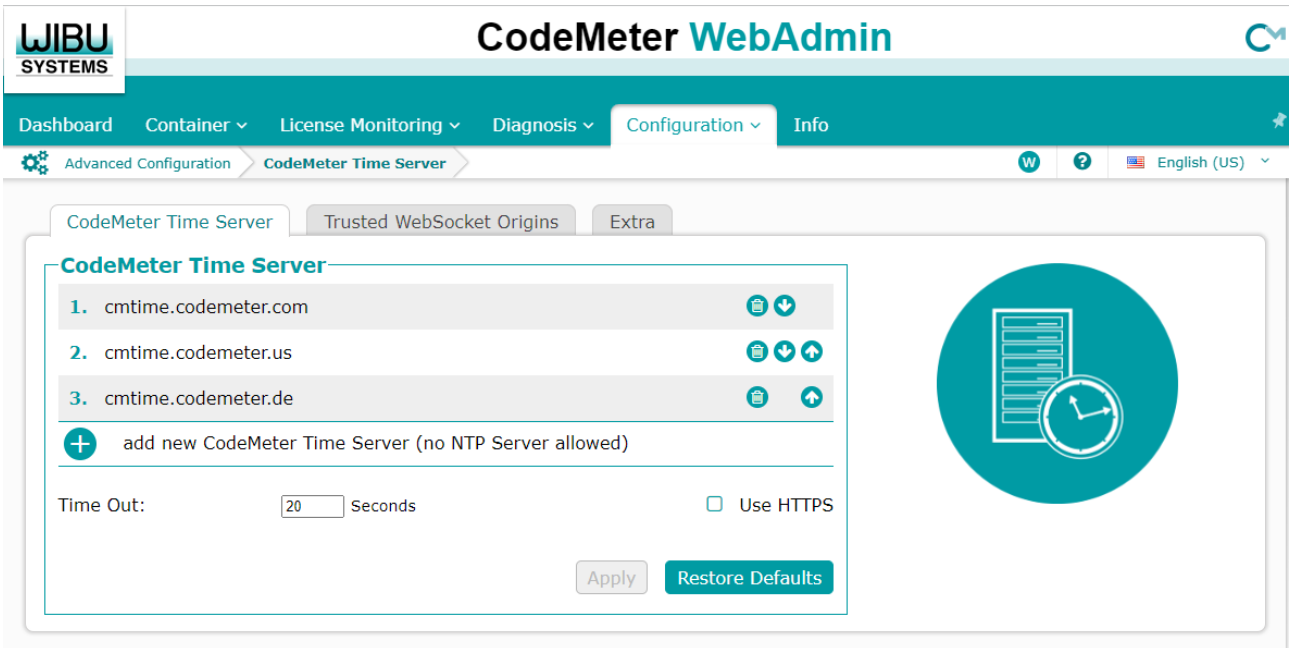

Warning: This is a functionality Vizrt currently does not support.

5.1.3 Advanced

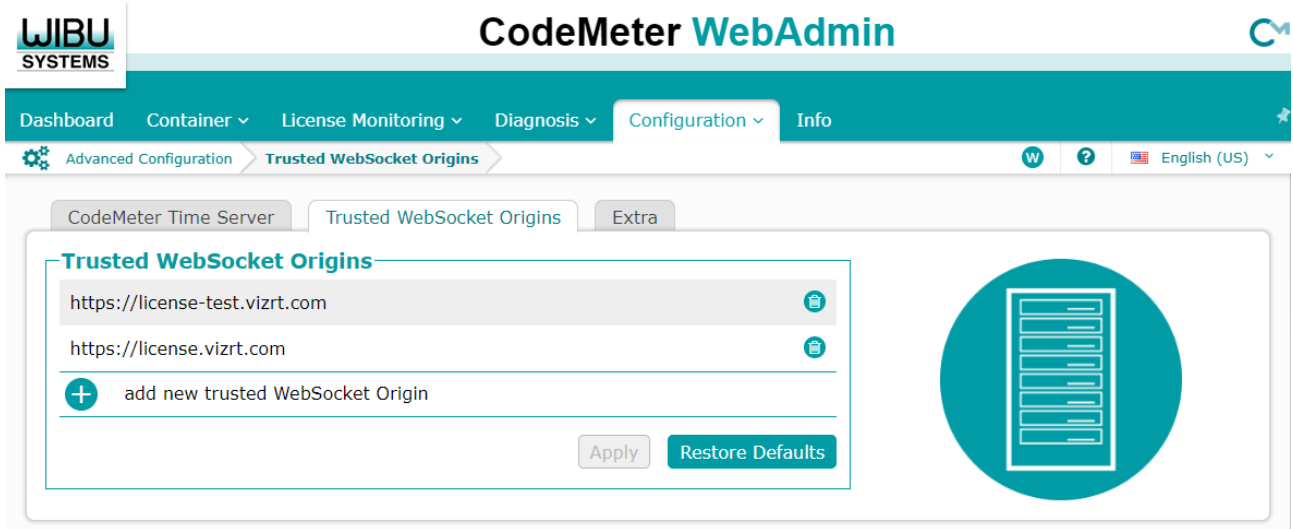

CodeMeter Time Server

Here you can select the CodeMeter Time Server.

Trusted WebSocket Origins

This section is used to add trusted WebSocket Origins if required.

The screenshot displays the CodeMeter WebAdmin interface. At the top left is the WJIBU SYSTEMS logo. The main title is "CodeMeter WebAdmin". The navigation bar includes "Dashboard", "Container", "License Monitoring", "Diagnosis", "Configuration", and "Info". The "Configuration" menu is expanded, showing "Advanced Configuration" and "Trusted WebSocket Origins". The "Trusted WebSocket Origins" page has three tabs: "CodeMeter Time Server", "Trusted WebSocket Origins", and "Extra". The "Trusted WebSocket Origins" tab is active, showing a list of origins: "https://license-test.vizrt.com" and "https://license.vizrt.com", each with a trash icon. Below the list is a "+ add new trusted WebSocket Origin" button. At the bottom of the list are "Apply" and "Restore Defaults" buttons. To the right of the list is a circular icon representing a server rack.

Extra

Extra is for additional configuration like the preferred **API-Communication-Mode** or **Advanced Network** settings.

Additional WebAdmin Configuration

Enable Prepared License Borrowing Configuration

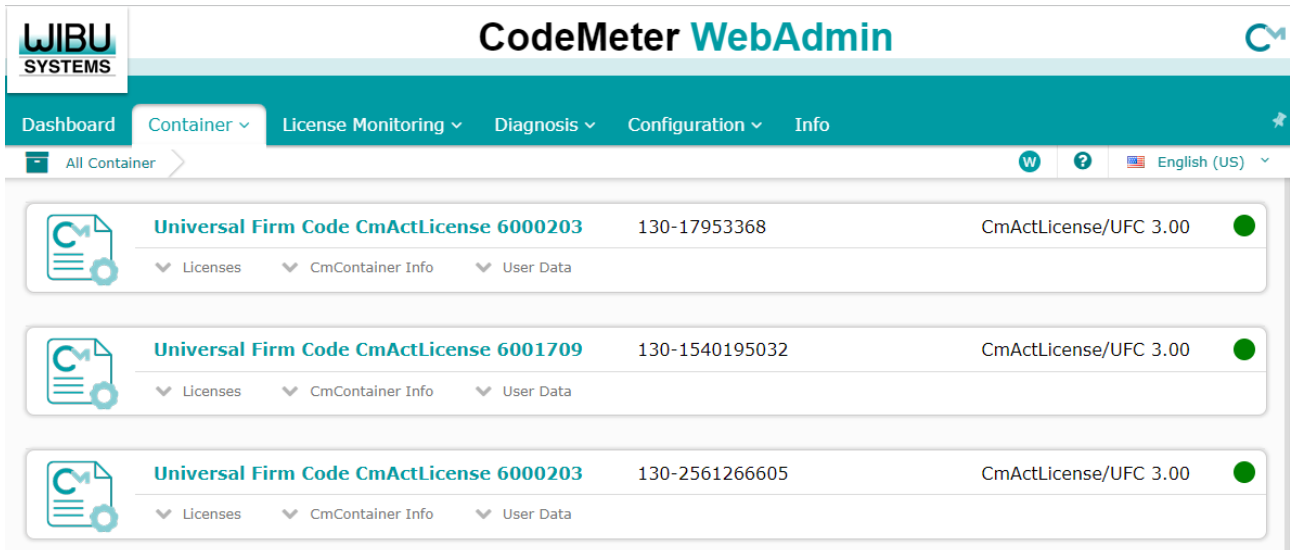

Prepared License Borrowing is supported for Firm Codes smaller than 6,000,000.

Edit

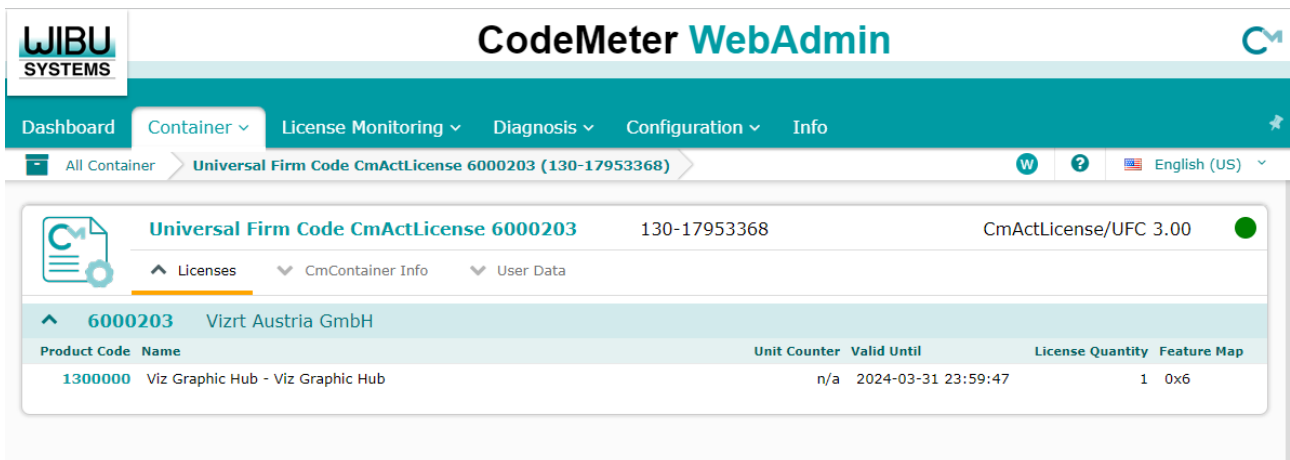

⚠ **Warning:** License Transfer and Prepared License Borrowing is currently not supported by Vizrt.

5.2 Container

The containers tab displays all locally connected dongles or Software Containers. It is possible to have multiple Software Containers or dongles connected to one system.

To access the content of a dongle or Software Container, click on the container to open it.

The available licenses, including expiration date and license quantity are displayed. Clicking on the **Product Code** in front of the feature name, shows the **Product Item Details**.

The screenshot shows the CodeMeter WebAdmin interface. The top navigation bar includes 'Dashboard', 'Container', 'License Monitoring', 'Diagnosis', 'Configuration', and 'Info'. The breadcrumb trail indicates the path: 'All Container' > 'Universal Firm Code CmActLicense 6000203 (130-17953368)' > 'Firm Code 6000203' > 'Product Code 1300000'. The main content area is titled 'Product Item Details' and shows information for 'Product Item 6000203:1300000 of CmContainer "Universal Firm Code CmActLicense 6000203" (130-17953368)'. Below this is a table with the following data:

Product Item Options	Size (Bytes)	Dependencies	Value
Text	33		Viz Graphic Hub - Viz Graphic Hub
Feature Map	4	data, serial, counter	0000 0000 0000 0000 0000 0000 0000 0110 (0x6)
Expiration Time	4	data, serial, counter	2024-03-31 23:59:47
License Quantity	4	data, serial, counter	1
Protected Data	22	data, serial, counter	0x6c 0x69 0x63 0x65 0x6e 0x73 0x65 0x61 0x63 0x63 0x65 0x73 0x73 0x74 0x79 0x70 0x65 0x3d 0x35 0x31 0x32 0x3b
Maintenance Period	8	data, serial, counter	Start: 2000-01-02 00:59:59 End: 2025-04-02 01:59:59
Extended Protected Data #0	30	data, serial, counter	0x00 0x00 0x00 0x1a 0x00 0x01 0x00 0x04 0x00 0x01 0x00 0x03 0x00 0x04 0x00 0x06 0x00 0x03 0x00 0x01 0x00 0x01 0x00 0x07 0x00 0x04 0x00 0x00 0x02 0x00
Extended Protected Data #136	16	data, serial, counter	0x6c 0x63 0x64 0x63 0x00 0x01 0xce 0xfc 0x14 0x00 0x00 0x00 0x00 0x00 0x01 0x00

The **Product Item Details** display information about the license. The most relevant are **Expiration Time**, **License Quantity** and the current **Maintenance Period** of the license.

Info: The Maintenance Period on the dongle or Software Container can be different to the one that is set in the license portal. If a newer Maintenance Period is available in the License Portal, the local license on Dongles or Software Containers can be updated.

5.3 Dashboard

The Dashboard is the landing page of CodeMeter WebAdmin. It displays a short overview of the current system as well as the sessions that are currently connected.

The screenshot shows the CodeMeter WebAdmin interface. At the top left is the WJIBU SYSTEMS logo. The main title is 'CodeMeter WebAdmin'. Below the title is a navigation bar with 'Dashboard', 'Container', 'License Monitoring', 'Diagnosis', 'Configuration', and 'Info'. A secondary bar shows 'Dashboard', a refresh icon, a help icon, and 'English (US)'. The main content area is divided into two panels. The left panel displays system details: Current Server (license-server), IP address (redacted), Operating System (Windows Server 2022), Server Startup (2023-10-31 16:54:05), Server Version (Version 7.60d of 13. October 2023 (Build 5638)), and Runtime Version (7.60d). The right panel is titled 'Sessions (916)' and shows a table of active sessions with columns for IP address, license key, and location.

IP address	License Key	Location
.....	6000203 : 3000000	Data Center - D ata Center Core
.....	6000203 : 3000000	Data Center - D ata Center Core
.....	6000203 : 3000000	Data Center - D ata Center Core

Info: The sessions window is only displayed when clients actively acquire licenses. More information about the sessions can be found in the [License Monitoring](#).

5.4 Diagnosis

The Diagnosis page displays the event log of the WIBU Runtime.

The screenshot shows the CodeMeter WebAdmin interface. At the top, there is a navigation bar with the WIBU SYSTEMS logo on the left and the CodeMeter WebAdmin title in the center. Below the navigation bar, there are several tabs: Dashboard, Container, License Monitoring, Diagnosis (which is selected), Configuration, and Info. On the right side of the navigation bar, there are icons for refresh, help, and language selection (English (US)).

The main content area is titled "Events" and displays a list of system events. The events are listed in a scrollable area and include details such as the date and time, the event ID, and the description of the event. The events are as follows:

```

AUTHORITY\LOCAL SERVICE) (SID 0x1234 / 0x00) with StationShare Mode

```

At the bottom of the interface, there is a status bar that displays "Current Server: license-server (.....)" and "WebAdmin Version: 7.60".

5.4.1 CmDust Log Export

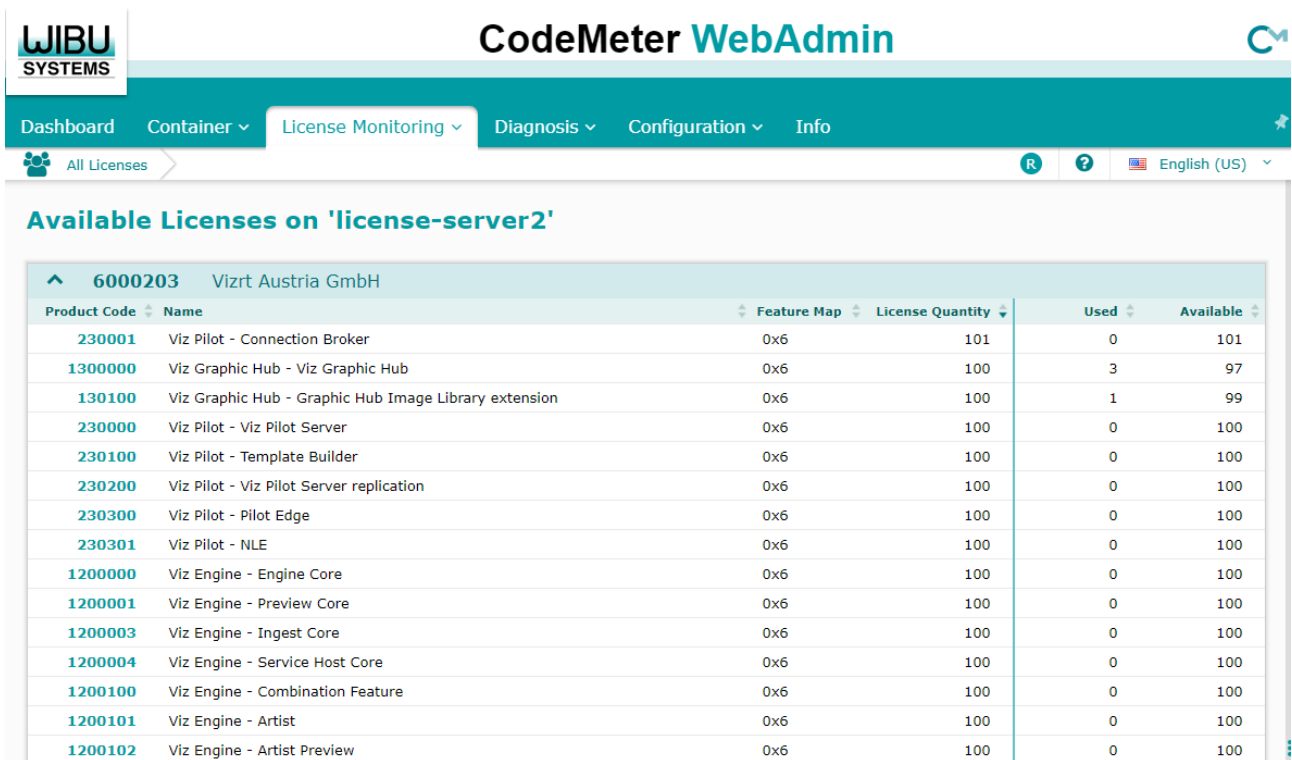

To export the log into a text file, open the Windows Search on the local machine of the CodeMeter WebAdmin and search for the CmDust application. Running this application collects all of the data from CodeMeter Runtime into a text file.

 **Info:** The CmDust application needs to be executed on the machine the Wibu Runtime is installed. This means that it needs to be executed on the license server directly in a license server workflow, or locally on a client when working with local dongles or Software Containers.

5.5 License Monitor

License Monitoring is used to monitor the usage of licenses on a license server. There are two different sections which can be selected by hovering the mouse over License Monitoring: **All Licenses** and **Sessions**.

5.5.1 All Licenses

The screenshot shows the CodeMeter WebAdmin interface. The top navigation bar includes 'Dashboard', 'Container', 'License Monitoring', 'Diagnosis', 'Configuration', and 'Info'. The 'License Monitoring' section is active, and the 'All Licenses' sub-section is selected. The main content area is titled 'Available Licenses on 'license-server2'' and shows a table of licenses for 'Vizrt Austria GmbH'.

Product Code	Name	Feature Map	License Quantity	Used	Available
230001	Viz Pilot - Connection Broker	0x6	101	0	101
1300000	Viz Graphic Hub - Viz Graphic Hub	0x6	100	3	97
130100	Viz Graphic Hub - Graphic Hub Image Library extension	0x6	100	1	99
230000	Viz Pilot - Viz Pilot Server	0x6	100	0	100
230100	Viz Pilot - Template Builder	0x6	100	0	100
230200	Viz Pilot - Viz Pilot Server replication	0x6	100	0	100
230300	Viz Pilot - Pilot Edge	0x6	100	0	100
230301	Viz Pilot - NLE	0x6	100	0	100
1200000	Viz Engine - Engine Core	0x6	100	0	100
1200001	Viz Engine - Preview Core	0x6	100	0	100
1200003	Viz Engine - Ingest Core	0x6	100	0	100
1200004	Viz Engine - Service Host Core	0x6	100	0	100
1200100	Viz Engine - Combination Feature	0x6	100	0	100
1200101	Viz Engine - Artist	0x6	100	0	100
1200102	Viz Engine - Artist Preview	0x6	100	0	100

The License Monitoring page shows the total License Quantity and the usage.

Clicking on the **Product Code**, shows the **License Monitoring Details** page where the exact users of the selected feature are displayed.

CodeMeter WebAdmin

Clicking on one of the connections, shows the **License Monitoring Details** page, described above.

6 Troubleshooting

- [License Activation Issues](#)
- [Refreshing Licenses Page](#)
- [Changing WIBU CodeMeter Runtime](#)

6.1 License Activation Issues

In case the license activation fails due to a network outage, the portal displays a short error message during the activation. The portal then redirects itself to the Licenses Page where a new option is available, **Continue License Transfer**.

The screenshot shows the Vizrt Licenses Page interface. At the top, there are navigation tabs: Customers, Admin, Licenses (selected), Containers, and Free Licenses. Below the navigation, there is a search bar and a 'Show 10 entries' dropdown. The main content is a table with columns: Ticket, Name, Order ID, QTY, End Date, Activated On, Container, and Status. The table contains two groups of licenses, each with a group name and a count in parentheses. The first group is '4V63S-2M97F-8BAS2-U373C-LGQ6C (5)' and the second is 'B4EW6-KH694-N279S-7RY33-U226H (5)'. The 'Continue License Transfer' button is highlighted with a red box.

Ticket	Name	Order ID	QTY	End Date	Activated On	Container	Status
^ 4V63S-2M97F-8BAS2-U373C-LGQ6C (5)

Buttons: [Activate Licenses](#) [Re-Host Licenses](#) [Continue License Transfer](#)

With this option, the portal can pick up any open license activation and complete it.

6.2 Refreshing Licenses Page

There is a known behavior on the Licenses Page, that it automatically refreshes the browser window every few seconds. This happens when no CodeMeter Runtime software is installed on the computer the License Portal is opened.

To resolve this issue, either install the CodeMeter Runtime, that can be downloaded from the [Account](#) section, or switch to a different page in the portal and then go back to the Licenses Page.

6.3 Changing WIBU CodeMeter Runtime

When changing the CodeMeter Runtime version on a machine with a Software Container installed, the Software Container corrupts itself due to a security mechanism implemented. It is

recommended to re-host the licenses back to the portal before performing the upgrade and using a new Software Container once the update is done.

7 FAQ

This page contains answers to the following frequently asked questions:

- [Can Licenses be Updated during Operation?](#)
- [How to Handle a Corrupted WIBU Software Container?](#)
- [Upgrading Sentinel Licenses to WIBU Licenses](#)

7.1 Can Licenses Be Updated During Operation?

When the ticket activation process starts, any license verification calls of Vizrt software are temporarily blocked. This means that the current operation runs without interruption against the former license status until the ticket activation process is completed.

7.2 How To Handle A Corrupted WIBU Software Container?

Changes in the hardware configuration of a computer (replacement of a motherboard, graphic card, CPU, ...) are the most common reasons for a corrupt software base license container. In this case, the license can no longer be used and the container must be deleted by Vizrt. You must then request a new license from your regional first-level support.

In order to receive a replacement license, please provide us the following documents:

- Official statement that describes the case (hardware is broken or stolen, ...).
- Photos of damaged hardware.
- In case of stolen parts, enclose the notice of loss.
- ID of the corrupt container or the computer name from which the container is located.

7.3 Upgrading Sentinel Licenses To WIBU Licenses

Customers are required to discuss license migration from Sentinel to WIBU with their manager or the CS team, who then reaches out with relevant information to the Licensing team.

There is a set definition of how Sentinel Dongles are translated to WIBU License Tickets. There are no automated upgrades in the portable once WIBU 3.0 is launched.

7.3.1 Upgrade Process Steps:

1. Customer defines the Sentinel dongles to upgrade, and the current use case of the licenses.
2. Vizrt provides temporary WIBU tickets with replacement licenses.
3. Customer tests the WIBU licenses to confirm functionality of the systems with the new licenses.
4. Customer returns permanent Sentinel dongles to Vizrt, or requests temporary licenses for the old dongles and provides prove of application of the temporary licenses on the dongles.
5. Vizrt provides permanent extension of the WIBU license tickets.
